# Introduction

This book has been prepared in accordance with "The Gazette of India, July 5, 2014". This Gazette released by "University Grants Commission" under the head of "Specification of Degrees" says that in exercise of the powers conferred by UGC Act 1956 and in suppression of all earlier Gazette Notifications pertaining to specification of Degrees, the University Grants Commission (UGC) with the approval of the Central Government hereby specifies the nomenclature of the degree for the purpose of the said Section.

Further to this, we have taken in consideration various other gazette amendments including the one of 21<sup>st</sup> July 2015 and of 31<sup>st</sup> May 2016 further upto 30<sup>th</sup> June 2023 for the current compilation.

Although UGC has broadly classified these Specifications in 15 categories for Bachelor Degrees after 12<sup>th</sup>, but for the ease of the readers, I have skipped few and further sub categorized few classifications and made a total of 22 Category Verticals.

A few Degree Nomenclatures given in this Booklet have been changed or restructured by UGC. But due to popularity of the older nomenclature, I have still incorporated them in the compilation. For e.g.: A popular degree course BJMC (Bachelor of Journalism and Mass Communication) or BMC (Bachelor of Mass Communication) has been restructured by UGC as BA (Journalism & Mass Communication). Still some universities use the name BJMC or BMC.

**Therefore the USP of this book is that any college/institute is offering a Degree Nomenclature which shows no presence in this book is either non-existent or marketed in a different way to attract students.**

Happy Reading and Forwarding!

## Streams Available after 10<sup>th</sup>

**There are 4 Primary Streams available after 10<sup>th</sup> in the Indian Education System, namely**

1. Science-A Group (with primary subjects as Physics, Chemistry and Maths)
2. Science-B Group (with primary subjects as Physics, Chemistry and Biology)
3. Commerce Group (with primary subjects as Accounts, Statistics, Economics and Business Studies)
4. Arts/Humanities Group (with primary subjects as History, Geography, Political Science, Sociology and Psychology)

There are few Schools who also offer an AB Group (with primary subjects as Physics, Chemistry, Mathematics and Biology. In this either Maths or Biology is termed as an additional subject)

The student has to choose one of the above mentioned groups of subjects in grade 11 and 12 primarily if the candidate wishes to pursue higher education in India.

## Different Boards available in India

There are five main education boards available in India. Students may choose a board that suits them best. The choice shall be made on the basis of difficulty level associated with the boards and aptitude of the student. The five available education boards are:

- IB (International Baccalaureate)
- Cambridge IGCSE (International General Certificate of Secondary Education)
- ISC (Indian School Certificate)
- CBSE (Central Board of Secondary Education)
- State Boards

**IB** is the most practical oriented board and thus is considered to be the toughest board among all. It focuses on the concept of 'What to learn' and 'how to learn'. This board gives one a good amount of Elective subject choices and in turn gives flexibility of what a child wishes to learn. Much emphasis is laid on 'application of knowledge' and 'practical aspects' of learning. In this Board, there is no concept of stream selection after 10<sup>th</sup> like Science, Commerce or Humanities/Arts. The candidate has to pick up subjects of his/her choice and then the choice available for graduation depends upon the eligibility of various graduate courses available.

**IB** Board is followed by **CIE or IGCSE** (regulated by Cambridge Assessment International Education, while International General Certificate of Secondary Education deals with Std. 10, AS and A Levels deal with std. 11 and 12 respectively) in its practical approach of pedagogy. This board also gives good number of Elective subject choices offering something for all learners of different abilities, interests and backgrounds. It focuses on developing vital educational knowledge, understanding and skills. Again, it is considered to be tougher than other national boards, because of advanced level of learning and the teaching methodology. In this Board also, there is no concept of stream selection after 10<sup>th</sup> like Science, Commerce or Humanities/Arts. The candidate has to pick up subjects of his/her choice and then the choice available for graduation depends upon the eligibility of various graduate courses available.

**ISC** board comes next in the difficulty level. This board also follows quite a bit of practical learning approach though reference books and the pedagogy is less rote oriented. In this board, the first level of selection of stream takes place after grade 8, i.e. Science or Commerce or Humanities. If you have taken Science, you can shift to any other stream after 10<sup>th</sup> but vice versa is not allowed by most of the schools. Second level of stream selection takes place after 10<sup>th</sup>. The options available are Science-A Group, Science-B Group, Commerce or Humanities/Arts. The candidate has to pick up Compulsory subjects of commerce stream and can choose 1 or 2 electives as per the offer of various schools.

Next in the difficulty scale is the **CBSE** board. I think most of us are aware of this board. This board is a good mix of practical and rote oriented Pedagogy. It functions under the Union Government of India. Difficulty level associated with this board is moderate.

Last comes **State Board**. Each State in India has its own education board. It functions under the respective State Government of each state. Language of instruction (medium) in case of schools affiliated to such boards may be regional language or English. This board in most cases is found to be rote oriented. There is lack of creativity and flexibility allowed in the method of pedagogy. Also the children studying through vernacular medium in state boards primarily look for studying at the state level itself.

# FAQs about Career Counseling

<b>Q.</b>	<b>What is Career Counseling?</b>
<b>A.</b>	Career Counseling is a process in which an expert helps you with your career exploration, career change, personal career development and other career related issues. This is a process in which the counselor gives advice on “career” with counseling techniques that simplifies complex decisions and difficult situations for the candidate. The expert helps you know yourself better using a set of questions - verbal or written. Based on the response, the expert guides you in getting answers to questions which cannot be answered by self.
<b>Q.</b>	<b>What is iQue BrainMapping?</b>
<b>A.</b>	Brain Mapping is “ <b>in person Interaction</b> ” process with the Counselor, in which the Aptitude of the candidate is assessed, looking at the comfort and natural bent towards different subjects which one is exposed to in the previous years of his/her academic or non academic areas. Following this, in the same “in person interaction”, Interest of the candidate is assessed by gauging their top of the mind recall and leisure time spent or desired. Lastly, the counselor talks to the parent or anyone closely related to the candidate to understand the influence of their surroundings along with family/Peer Group/Social Impact. At the end, a detailed analysis of <b>Orientation, Aptitude, Interest and Personality (OAIP)</b> of the candidate is shared and discussed to create further career plan and line of action.
<b>Q.</b>	<b>Why is iQue BrainMapping the MOST Effective tool for Career Counseling?</b>
<b>A.</b>	The Brain Mapping method of Career Counseling is MOST effective tool due to three reasons: <ol style="list-style-type: none"><li>1) Since the process is personal interaction based, each response of the candidate can be assessed carefully and which response has to be discounted or enhanced, can be taken in consideration by the counselor, which is impossible in any other form of assessment.</li><li>2) An open option of deep probing is available, if in any response the counselor feels some disconnect. This is impossible in any other form of assessment in the first round. Only in the second round it can be done, that too if and only if the counselor is able to figure out the discrepancy, which is extremely difficult.</li><li>3) Counselor can remove any ambiguity in the response, if found, at any point of time during the interaction. This is impossible in any other form of assessment in the First round. Only in the second round it can be eliminated provided, the counsellor is able to figure out the discrepancy which is extremely difficult.</li></ol>
<b>Q.</b>	<b>What is Multiple Choice Aptitude Test and why its results are not effective?</b>
<b>A.</b>	A test containing Psychometric questions of multiple choice type, ranging between 100 to 600 in number, to be completed in a given time frame is Multiple Choice Psychometric Test. This test is administered to the candidate and then the report based on the child's response in form of A/B/C/D options is generated. This tool used for the purpose of career counseling has many drawbacks. <ol style="list-style-type: none"><li>1) These Multiple Choice Tests were built to cater to masses because individual counseling and probing takes a lot of time and the scalability is restricted, whereas we believe Career Counseling is a very Individualistic Process and cannot be done in masses.</li><li>2) Most of these tests are developed in western countries and are not sufficiently tested and balanced as per Indian needs.</li><li>3) The process of execution of these tests has a lacuna where most of the candidates either do not understand many questions or after answering a few questions loose interest in the assessment and just start marking the choices at random. This drastically affects the reliability of the report generated based on responses given and thus renders the process inefficient for Career Counseling.</li><li>4) Also through these written MCQ tests, there is no way for the counselor to find out any discrepancy in the result for deep probing and thus any random marking cannot be judged or identified.</li></ol>
<b>Q.</b>	<b>What is DMIT (Dermatoglyphics Multiple Intelligence Test)? Why is it ineffective?</b>
<b>A.</b>	DMIT, also known as “Dermatoglyphics Multiple Intelligence Test” is JUST an empirical study which is associated with biometrics and brain lobes. This study claims to help in understanding a unique inborn potential and personality. This study was conducted by Howard Gardner and he proposed this model in his book in 1983 “Frames of Mind: The Theory of Multiple Intelligences”. This was a research thesis project which showed some correlation between finger prints and Multiple Intelligences. It was picked up by some Marketers who published and marketed it well in third world countries like India, Sri Lanka, Pakistan, Bhutan, Bangladesh, Honk Kong etc. There is NO research or clinical evidence to prove the authenticity of the same. It is like shooting without a target which one will hit every time.

- Gradually exams from class 9 onwards will be semester based. This, however will be implemented in the second phase of exam reforms.
- Right now priority shall be given to design the new syllabus and prepare the textbooks of class IX to XII.
- The secondary stage will be divided into phases:
  - o Broad curricular areas like science, social science, humanities etc. to be chosen in class 9 and 10.
  - o Disciplines like physics, history, chemistry, languages etc. within each curricular area to be chosen in class 11 and 12.

# FAQs by Parents of School Students

<b>Q.</b>	<b>How do I help my child choose the right career option after school?</b>
<b>A.</b>	Identifying the <b>Orientation, Aptitude, Personality and Interest (OAPI)</b> of the child is the key to choose the right career option. . Their overall priority of selection of one task above the other indicates their orientation. Their comfort in particular subjects at Class 9 / 10 level and further at Class 11 / 12 level helps in understanding their aptitude. Observing the candidate in school/college, amongst friends, society, cousins, relatives etc. will give an insight about their personality. Activities which they like being engaged with, shows their interest area. For deeper understanding of your child, get the child's OAPI assessment. Mr. Mohit Mangal and his team will do the <b>BrainMapping</b> of the candidate and assess their OAPI. By aligning these four parameters, we can help the candidate choose the right subject combination in class 9-12 and right Degree option beyond.
<b>Q.</b>	<b>What are the different Career options after 10th?</b>
<b>A.</b>	In Indian education System, traditionally there were only 4 options available after Class 10. The child could choose <b>Science Group</b> (Physics, Chemistry, and Mathematics/Biology), <b>Commerce Group</b> (Accounts, Statistics, Economics and Business studies), <b>Arts/Humanities Group</b> (History, Geography, Psychology, Political Science and Sociology) or could go for a 3 year skill based <b>Diploma</b> Program. With the <b>NEP-2020</b> getting into implementation, at present children have more than 9 broad options and more than 27 Combination Options after class 10 to choose from. If you want to know about all these options in detail, you may visit our YouTube channel and watch related video for the same.
<b>Q.</b>	<b>What are the different career options after 12th?</b>
<b>A.</b>	University Grants Commission (UGC), which is the parent regulatory body of Higher Education in India under the Ministry of HRD, has broadly classified education in 15 broad areas after Class 12 for Bachelor Degrees. For the ease of understanding of the parents and students, Mr. Mangal has sub categorized a few areas and made a total of 22 verticals in which a child passing from Class 12 can take bachelor degree in. Out of these 22, there are 16 verticals of education, in which a student can take Bachelor Degree after studying ANY combination of subjects in class 11 & 12 or a three year Diploma.
<b>Q.</b>	<b>My child is not good at Math, will a lot of streams get closed for them if they leave Math after 10th?</b>
<b>A.</b>	No, for the 16 general verticals (as stated above) open to any subject combination, mathematics is not required in Class 11 / 12. Even Entrance Exams at all levels, be it Bachelor or Master, always expect the child to have knowledge of only Class X Level Maths. Higher Maths is not required for any General Entrance exam, be it SAT, ACT, GMAT, GRE for international studies or CUET-UG, IPMAT, CLAT, SET, CAT, CMAT, XAT, NET Etc. For Domestic studies. So, <b>DO NOT WORRY</b> , the child shall not be at loss anywhere.
<b>Q.</b>	<b>My child wants to follow his friends after class X / XII. What should I do?</b>
<b>A.</b>	Mr. Mangal very commonly quotes, " <b>Do not Follow Friends or Trends</b> ". Please do not allow your child to follow the same subject combinations which their friends are taking. This is because each child is unique and their OAPI may not match or be same as his best friend. For deeper understanding of your child, get the child's OAPI assessment. Mr. Mohit Mangal and his team will do the Brain mapping of the candidate and assess their OAPI to help them choose the right course/plan forward.
<b>Q.</b>	<b>We want our child to join family business. Which course is most suitable for him/her?</b>
<b>A.</b>	The course which match their <b>OAPI</b> is the most suitable course for them. Pushing the child in a degree program matching your family business may not be the right thing to do. Rather we should give them a course of their interest which will make the child smart and continue being motivated to study the same. Subsequently after any education vertical, they will be in a position to take the family business forward in a better way.
<b>Q.</b>	<b>My child has a wavering mind and comes up with a different choice every now and then. What should I do?</b>
<b>A.</b>	At this age, all the four parameters i.e. <b>Orientation, Aptitude, Personality and Interest (OAPI)</b> could change naturally or by putting conscious efforts. So, in a way, it's good if they have a wavering mind, because at least they are observing, thinking and trying to explore. You can take help from Mr. Mohit Mangal and his team, who will assess the OAPI of the child and help them choose the right course/plan forward.
<b>Q.</b>	<b>I want my child to take up my profession, but am not sure if they will be able to do that?</b>
<b>A.</b>	You can take help from an Expert Career Counsellor. Mr. Mohit Mangal and his team will do the <b>BrainMapping</b> of the Child and assess their Orientation, Aptitude, Personality and Interest (OAPI). By aligning these four parameters, the child can be helped in choosing the right subject combination in class 8 / 10 and right Degree option after Class 12.

<b>A.</b>	Any candidate with minimum 21 Years of age and having completed Graduation from ANY STREAM can appear for the Exam. Traditionally Students preferred an Arts graduation, since this degree gave time for preparation of UPSC, but off late I see students from all fields, be it Medicine, Engineering or Commerce give UPSC and crack the exam. One latest trend which I see is that students go for a 5 Year Law program after Class 12 and then give UPSC Exam. This helps them in three ways: Firstly, their legal studies is in line with the study requirements of UPSC, so preparation becomes relatively automated. Secondly, Legal Studies also opens door to Judiciary Examinations. <b>Q.</b>	<b>How can I Become an Aerospace Engineer?</b>
<b>A.</b>	Engineering is a Science related field. The student can take Science as the stream (With Physic, Chemistry and Mathematics) in Std. XI and XII. The student should then study a B.E. / B.Tech. in Aerospace Engineering. Admissions to these programs can be obtained through entrance exams such as the JEE (Mains and Advanced). Consequently, the student may pursue and M.Tech. in Aerospace Engineering. Prominent institutions such as the Indian Institutions of Technology (IITs) offer this program.
<b>Q.</b>	<b>Is it Compulsory to study Science for getting in Computer Sciences?</b>
<b>A.</b>	No. Even if a candidate is studying Commerce or Humanities subjects in Std. 11 & 12, still one can pursue Computer sciences through BCA (Bachelor of Computer Applications) or a B.Sc. (Computer sciences / Information technology).
<b>Q.</b>	<b>I am good with Maths and Physics but find difficulty in coping with Chemistry or I am good with Biology and Chemistry but find difficulty in coping with Physics. What should I do?</b>
<b>A.</b>	Every student has a natural aptitude for certain types of subjects. Chemistry & Biology are subjects that requires theoretical understanding of concepts and are more rote oriented whereas Mathematics and Physics are subjects which require mathematical and numerical understanding and are more analytical in nature. Typically, a student who may be mediocre in aptitude for theory or analytics, may find it difficult to cope with Physics / Chemistry. To cope with the subject, the student must first work on getting conceptual clarity of the topics. With patience and hard work, it is possible to perform adequately well in weak subjects. While the student may find it a little difficult to devote adequate time on such subjects, one must persist over a long period of time to make sure that they cover up their shortcoming.

<b>A.</b>	In short, paleontology is the study of what fossils tell us about the ecologies of the past, about evolution, and about our place, as humans, in the world. Paleontology incorporates knowledge from biology, geology, ecology, anthropology, archaeology, and even computer science to understand the processes that have led to the origination and eventual destruction of the different types of organisms since life arose. Therefore one should study History and Biology combination.
<b>Q.</b>	<b>Can I Study Law in India and practice abroad?</b>
<b>A.</b>	To practice in the courts of a country, one may need to clear the Bar Council (or equivalent) exam. A theoretical understanding of the subject is necessary. However, it is also important to know the law (statutes) specific to the country that one plans to practice in. A student who has studies in India, would find it easier to clear the Bar exam in India. Similarly, a student from a US based law college, would find it easier to clear the Bar Exam in a state of the US, than a student from India. While it is possible to study law in one country and practice in another, it is highly recommended that one study law from the country that one plans to practice in.
<b>Q.</b>	<b>As a Commerce or Arts Student, can I pursue B. Sc. Computer Science or B. Sc. Data Science?</b>

However, as a word of caution, a significant number of students in such courses may have some prior knowledge of computer languages (such as C, C++, Java, Python etc.). It would be advisable to get some basic knowledge in these areas.
<b>Q.</b>	<b>Which area of education should I choose which will not be effected by AI in future?</b>
