PREFACE

CBSE as a pace setting national Board has constantly been striving to design its evaluation process in a manner that it is used as a powerful means of influencing the quality of teaching and learning in the classroom situation. Also, it has to be so designed that it provides constant feedback regarding the effectiveness of the course content, classroom processes and the growth of individual learners besides the appropriateness of evaluation procedures.

As a move in this direction, CBSE started the practice of publishing the Marking Schemes with twin objectives in mind-(i) making the system more transparent and at the same time, (ii) ensuring high degree of reliability in scoring procedure.

Who are the markers of answer scripts? How do they mark the answer scripts? How can it be ensured that marking is fair, objective and reliable? Questions of these types naturally arise in the minds of candidates appearing in the public examination. These questions are equally pertinent to the teachers who are not adequately exposed to the CBSE system of marking.

Answer Scripts marking is a specialised job. It is assigned to teachers-PGTs for Class XII and TGTs for Class X who are in direct touch with the subject and have a minimum of 3 years experience of teaching the subject at that level. Appointment of examiners is made in accordance with the well-defined norms. Markers examine scripts with the help of detailed guidelines called the 'Marking Schemes'.

It is this tool (Marking Scheme) alongwith the extensive supervisory checks and counter-checks through which CBSE tries to ensure objective and fair marking. The present publication is being brought out with a view to serving the following objectives :

- (i) To give an opportunity to the teachers and students to look into the Marking Schemes that were developed by the Board and supplied to the evaluators in 2012 main examination in some selected main subjects.
- (ii) To receive feedback and suggestions from institutions/subject teachers on the utility and further improvement of Marking Schemes.
- (iii) To encourage institutions to undertake similar exercise of developing marking schemes for classes other than those covered by the Board's examination with a view to increasing teachers' responsiveness to them as the essential tools of evaluation.

HOW TO USE

Teachers and the students preparing for Class XII examination of the Board constitute the primary interest-group of this publication. Marking Schemes of Question Papers in the subjects of English Core, Functional English, Mathematics, Economics, Business Studies, Accountancy and Entrepreneurship administered in Delhi and Outside Delhi during the 2012 main examination have been included in this document. Some tips on their usage are given below :

(a) To Teachers :

- Go through the syllabus and the weightage distribution for the subject carefully.
- Read the question paper to find out how far the question paper set subscribes to the prescribed design. Grade every question by difficulty level for students who have taken the main Board examination.
- Consult the 'Marking Scheme' for each question, with reference to steps into which answers and awards have been divided.
- Work out concrete suggestions for the Board.

(b) To Students :

- Study each question carefully, comprehend them and write down the main points of the answer and note down their difficulties for clarification.
- Examine a question in conjunction with the Marking Scheme and find out the proximity of the answer to that suggested in the Marking Scheme.

We urge the teachers to encourage their students to make use of this publication.

QUESTION PAPER CODE 1/1/1

SECTION A : READING

20 Marks

1. Read the passage given below and answer the questions that follow:

12 marks

1. While there is no denying that the world loves a winner, it is important that you recognize the signs of stress in your behaviour and be healthy enough to enjoy your success. Stress can strike anytime, in a fashion that may leave you unaware of its presence in your life. While a certain amount of pressure is necessary for performance, it is important to be able to recognise your individual limit. For instance, there are some individuals who accept competition in a healthy fashion. There are others who collapse into weeping wrecks before an exam or on comparing marks-sheets and finding that their friend has scored better.
2. Stress is a body reaction to any demands or changes in its internal and external environment. Whenever there is a change in the external environment such as temperature, pollutants, humidity and working conditions, it leads to stress. In these days of competition when a person makes up his mind to surpass what has been achieved by others, leading to an imbalance between demands and resources, it causes psycho-social stress. It is a part and parcel of everyday life.
3. Stress has a different meaning, depending on the stage of life you are in. The loss of a toy or a reprimand from the parents might create a stress shock in a child. An adolescent who fails an examination may feel as if everything has been lost and life has no further meaning. In an adult the loss of his or her

companion, job or professional failure may appear as if there is nothing more to be achieved.

4. Such signs appear in the attitude and behaviour of the individual, as muscle tension in various parts of the body, palpitation and high blood pressure, indigestion and hyper-acidity. Ultimately the result is self-destructive behaviour such as eating and drinking too much, smoking excessively, relying on tranquilisers. There are other signs of stress such as trembling, shaking, nervous blinking, dryness of throat and mouth and difficulty in swallowing.
 5. The professional under stress behaves as if he is a perfectionist. It leads to depression, lethargy and weakness. Periodic mood shifts also indicate the stress status of the students, executives and professionals.
 6. In a study sponsored by World Health Organization and carried out by Harvard School of Public Health, the global burden of diseases and injury indicated that stress diseases and accidents are going to be the major killers in 2020.
 7. The heart disease and depression - both stress diseases - are going to rank first and second in 2020. Road traffic accidents are going to be the third largest killers. These accidents are also an indicator of psycho-social stress in a fast moving society. Other stress diseases like ulcers, hypertension and sleeplessness have assumed epidemic proportions in modern societies.
 8. A person under stress reacts in different ways and the common ones are flight, fight and flee depending upon the nature of the stress and capabilities of the person. The three responses can be elegantly chosen to cope with the stress so that stress does not damage the system and become distress.
 9. When a stress crosses the limit, peculiar to an individual, it lowers his performance capacity. Frequent crossings of the limit may result in chronic fatigue in which a person feels lethargic, disinterested and is not easily motivated to achieve anything. This may make the person mentally undecided, confused and accident prone as well. Sudden exposure to un-nerving stress may also result in a loss of memory. Diet, massage, food supplements, herbal medicines, hobbies, relaxation techniques and dance movements are excellent stress busters.
- (a) (i) What is stress? What factors lead to stress? 2
- (ii) What are the signs by which a person can know that he is under stress? 2

- (iii) What are the different diseases a person gets due to stress? 2
- (iv) Give any two examples of stress busters. 1
- (v) How does a person react under stress? 2
- (b) Which words in the above passage mean the same as the following? 3
 - (i) fall down (para 1)
 - (ii) rebuke (para 3)
 - (iii) inactive (para 9)

2. Read the passage given below and answer the questions that follow:

8 marks

Research has shown that the human mind can process words at the rate of about 500 per minute, whereas a speaker speaks at the rate of about 150 words a minute. The difference between the two at 350 is quite large.

So a speaker must make every effort to retain the attention of the audience and the listener should also be careful not to let his mind wander. Good communication calls for good listening skills. A good speaker must necessarily be a good listener.

Listening starts with hearing but goes beyond. Hearing, in other words is necessary but is not a sufficient condition for listening. Listening involves hearing with attention. Listening is a process that calls for concentration. While, listening, one should also be observant. In other words, listening has to do with the ears, as well as with the eyes and the mind. Listening is to be understood as the total process that involves hearing with attention, being observant and making interpretations. Good communication is essentially an interactive process. It calls for participation and involvement. It is quite often a dialogue rather than a monologue. It is necessary to be interested and also show or make it abundantly clear that one is interested in knowing what the other person has to say.

Good listening is an art that can be cultivated. It relates to skills that can be developed. A good listener knows the art of getting much more than what the speaker is trying to convey. He knows how to prompt, persuade but not to cut off or interrupt what the other person has to say. At times the speaker may or may not be coherent, articulate and well organised in his thoughts and expressions. He may have it in his mind and yet he may fail to marshal the right words while communicating his thought. Nevertheless a good listener puts him at ease, helps him articulate and facilitates him

to get across the message that he wants to convey. For listening to be effective, it is also necessary that barriers to listening are removed. Such barriers can be both physical and psychological. Physical barriers generally relate to hindrances to proper hearing whereas psychological barriers are more fundamental and relate to the interpretation and evaluation of the speaker and the message.

- (a) On the basis of your reading of the above passage, make notes in points only, using abbreviations wherever necessary. Supply a suitable title. 5
- (b) Write a summary of the above passage in about 80 words. 3

QUESTION PAPER CODE 1/1

SECTION A : READING

20 Marks

1. Read the passage given below and answer the questions that follow:

12 marks

- 1 While there is no denying that the world loves a winner, it is important that you recognise the signs of stress in your behaviour and be healthy enough to enjoy your success. Stress can strike anytime, in a fashion that may leave you unaware of its presence in your life. While a certain amount of pressure is necessary for performance, it is important to be able to recognise your individual limit. For instance, there are some individuals who accept competition in a healthy fashion. There are others who collapse into weeping wrecks before an exam or on comparing mark-sheets and finding that their friend has scored better.
- 2 Stress is a body reaction to any demands or changes in its internal and external environment. Whenever there is a change in the external environment such as temperature, pollutants, humidity and working conditions, it leads to stress. In these days of competition when a person makes up his mind to surpass what has been achieved by others, leading to an imbalance between demands and resources, it causes psycho-social stress. It is a part and parcel of everyday life.
- 3 Stress has a different meaning, depending on the stage of life you are in. The loss of a toy or a reprimand from the parents might create a stress shock in a child. An adolescent who fails an examination may feel as if everything has been lost and life has no further meaning. In an adult the loss of his or her companion, job or professional failure may appear as if there is nothing more to be achieved.
- 4 Such signs appear in the attitude and behaviour of the individual, as muscle tension in various parts of the body, palpitation and high blood pressure, indigestion and hyper-acidity. Ultimately the result is self-destructive behaviour

such as eating and drinking too much, smoking excessively, relying on tranquilisers. There are other signs of stress such as trembling, shaking, nervous blinking, dryness of throat and mouth and difficulty in swallowing.

- 5 The professional under stress behaves as if he is a perfectionist. It leads to depression, lethargy and weakness. Periodic mood shifts also indicate the stress status of the students, executives and professionals.
- 6 In a study sponsored by World Health Organisation and carried out by Harvard School of Public Health, the global burden of diseases and injury indicated that stress diseases and accidents are going to be the major killers in 2020.
- 7 The heart disease and depression - both stress diseases - are going to rank first and second in 2020. Road traffic accidents are going to be the third largest killers. These accidents are also an indicator of psycho-social stress in a fast-moving society. Other stress diseases like ulcers, hypertension and sleeplessness have assumed epidemic proportions in modern societies.
- 8 A person under stress reacts in different ways and the common ones are flight, fight and flee depending upon the nature of the stress and capabilities of the person. The three responses can be elegantly chosen to cope with the stress so that stress does not damage the system and become distress.
- 9 When a stress crosses the limit, peculiar to an individual, it lowers his performance capacity. Frequent crossings of the limit may result in chronic fatigue in which a person feels lethargic, disinterested and is not easily motivated to achieve anything. This may make the person mentally undecided, confused and accident prone as well. Sudden exposure to un-nerving stress may also result in a loss of memory. Diet, massage, food supplements, herbal medicines, hobbies, relaxation techniques and dance movements are excellent stress busters.
 - (a) (i) What is stress? What factors lead to stress? 2
 - (ii) What are the signs by which a person can know that he is under stress? 2
 - (iii) What are the different diseases a person gets due to stress? 2
 - (iv) Give any two examples of stress busters. 1
 - (v) How does a person react under stress? 2

(b) Which words in the above passage mean the same as the following?

3

(i) fall down (para 1)

(ii) rebuke (para 3)

(iii) inactive (para 9)

2. Read the passage given below and answer the questions that follow:

8 marks

Research has shown that the human mind can process words at the rate of about 500 per minute, whereas a speaker speaks at the rate of about 150 words a minute. The difference between the two at 350 is quite large.

So a speaker must make every effort to retain the attention of the audience and the listener should also be careful not to let his mind wander. Good communication calls for good listening skills. A good speaker must necessarily be a good listener.

Listening starts with hearing but goes beyond. Hearing, in other words is necessary, but is not a sufficient condition for listening. Listening involves hearing with attention. Listening is a process that calls for concentration. While listening, one should also be observant. In other words, listening has to do with the ears, as well as with the eyes and the mind. Listening is to be understood as the total process that involves hearing with attention, being observant and making interpretations. Good communication is essentially an interactive process. It calls for participation and involvement: It is quite often a dialogue rather than a monologue. It is necessary to be interested and also show or make it abundantly clear that one is interested in knowing what the other person has to say.

Good listening is an art that can be cultivated. It relates to skills that can be developed. A good listener knows the art of getting much more than what the speaker is trying to convey. He knows how to prompt, persuade but not to cut off or interrupt what the other person has to say. At times the speaker may or may not be coherent, articulate and well-organised in his thoughts and expressions. He may have it in his mind and yet he may fail to marshal the right words while communicating his thought. Nevertheless a good listener puts him at ease, helps him articulate and facilitates him to get across the message that he wants to convey. For listening to be effective, it is also necessary that barriers to listening are removed. Such barriers can be both physical and psychological. Physical barriers generally relate to hindrances to proper hearing whereas psychological barriers are more fundamental and relate to the interpretation and evaluation of the speaker and the message.

- (a) On the basis of your reading of the above passage, make notes in points only, using abbreviations wherever necessary. Supply a suitable title. 5
- (b) Write a summary of the above passage in about 80 words. 3

Marking Scheme — English Core

General Instructions :

1. Evaluation is to be done as per instructions provided in the Marking Scheme Only.
2. The Marking Scheme provides suggested value points and not the complete answers.
3. If a question has parts, marks must be awarded on the right hand side for each part. Marks awarded to different parts of a question should then be totalled up, written and circled on the left-hand margin of the answers concerned.
4. If a question does not have any parts, marks for that question must be awarded on the left-hand margin of the answer.
5. Where marks are allotted separately for content and expression as per the Marking Scheme, they have to be reflected separately and then totalled up. This is mandatory.
6. A slash (/) in the Marking Scheme indicates alternative answers(s) to a question. If a student writes an answer which is not given in the Marking Scheme but which seems to be equally acceptable, marks must be awarded in consultation with the Head-Examiner.
7. If a child has attempted an extra-question, the answer deserving more marks should be retained and the other answer be scored out.
8. Q1 under Section A (Reading) and Q7(a) under Section C (Text Books) have been designed to test students' ability to comprehend the given passage. As such the examinees need not to be unnecessarily penalised for their language errors.
9. Where questions have been designed to test the writing skills of students, the expression (grammatical accuracy, appropriate use of words, style, spelling, organization and presentation of relevant matter in a coherent and logical way) assumes as much importance as the content.
10. Identify major mistakes and shortcomings before awarding marks.
11. Wherever the word limit is given, no marks be deducted for exceeding it. However, due credit should be given for precise answers.

12. If a student, in response to a short-answer-type question, writes a single word / phrase answer which constitutes the core of the answer, it must be accepted and awarded marks.
13. If a student literally lifts a portion of the given passage / extract from the question paper as an answer to a question, no mark(s) to be deducted on this count as long as it is relevant and indicative of the desired understanding on the part of the student [reference questions under Q1 and Q7(a)].
14. A full scale of marks - 0 to 100 - is to be used while awarding marks. In case of an answer book deserving 90 marks and above, marks be awarded only in consultation with the Head Examiner.
15. As per orders of the Hon'ble Supreme Court, the candidates would now be permitted to obtain photocopy of the answer book on request on payment of the prescribed fee. All examiners/head examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.

[FOR THE HEAD EXAMINERS ONLY]

1. Answer scripts must be given to the evaluators for evaluation only after the given Marking Scheme has been thoroughly discussed with them collectively or individually. No exceptions, please.
2. The Head Examiner is required to go through the first five evaluated answer scripts of each examiner scrupulously to ensure that the evaluator concerned has evaluated the answer scripts as per the instructions provided in the Marking Scheme.
3. The Head Examiner is expected to examine the answer containing the value points that has not been provided in the Marking Scheme but the evaluator finds it equally correct for the purpose of awarding marks and give his / her decision which will be binding on the evaluator.
4. It is the bounden duty of each and every Head Examiner to do the random checking along with the answer books which deserve 90 marks and above, as reported by individual evaluators. The final decision in this regard, however, will rest with the Head Examiner only.

QUESTION PAPER CODE 212/1

SECTION A : READING

(20 Marks)

1. Read the passage given below and answer the questions that follow:

12 marks

- (1) It was the year 2003. As a part of my efforts to understand schools and children of all ages, I happened to visit a Bangalore school that had a pre-school section. I followed the standard strategy of being a "fly on the wall," observing, absorbing, and when the situation was conducive, asking questions to students, teachers and administrators there.
- (2) The four-year-old in the junior kindergarten class was smart and highly communicative. She was very forthcoming with her responses. I asked her what she liked and what she did not like in general. She loved her school, her teacher, her mother, and her grandmother. She did not like it when her elder brother fought with her. She also did not like it when her grandmother told her bed-time stories!
- (3) This was rather strange, since I had believed that most children liked stories told by the elders in the family. So I was wondering why she did not like her grandmother telling her bed-time stories. After some patient interaction, the little girl told us: "When she tells me the stories, I go to sleep. But she wakes me up and asks me - the moral of the story!" I was stunned by her unexpected explanation. What struck me personally was the girl's ability to explain her discomfort. I also began to think about several misconceptions that elders have about issues related to the next generations.

- (4) Such as that we believe the stories are told in order that children would understand the moral of the story. Or that they go to the school to learn. Or that employees go to office to work.
- (5) Is it correct to assume that children go to school only to learn? They could be going there because that is what is expected of them by their parents. Or because they like to be with their friends in school. Or for the one teacher who tells them nice stories. Or they like the playground and the sports facilities.
- (6) The children are not even at a stage to understand the "moral" of the story. They may understand it cumulatively through several stories - which would be sunk in several layers of their understanding, only to emerge later. Or their moral of the story would be different than what we understand it to be. What about the pure enjoyment of the story by itself? What about several other uses of the story - such as understanding the language, relating to the characters, imagining the ethos, the feelings, and so on ?
- (7) As in many spheres of life, one of the biggest challenges in the educational system is that we have a first generation of leaders and educators that decide the education policy, the second generation of teachers that are responsible for facilitating education for the children who belong to a third generation.
- (8) Understanding third-generation children is a complex process and needs special efforts on the part of all concerned, including parents.
- (9) The third-generation children are fearless, articulate, independent, rational (capable of a high degree of analysis on "what is right and wrong" for them), impatient, non-hierarchical, and have wider methods of accessing knowledge. This requires a radically different organization of schools and classrooms, including in terms of the seating arrangements, the teaching-learning process, methods and material, and the quality of interaction with the children. Parents and teachers must jointly understand that comparing situations with their own childhood and therefore expecting certain types of responses from the children, will not work.
- (10) Children and their future must be at the heart of any decisions about curriculum, classroom practices, examination system and school management system.
 - (a) On the basis of your understanding of the passage, answer the following in your own words:

- | | |
|---|---|
| (i) Why did the little girl in the kindergarten not like the stories told by her grandmother? | 2 |
| (ii) What is the writer's opinion about children being told stories with morals? | 2 |
| (iii) What according to the writer is the problem with the education system today? | 2 |
| (iv) According to the writer what should be the focus of modern day school system? | 2 |
| (b) Pick out words/phrases from the passage which are similar in meaning to the following: | 4 |
| (i) watching without being noticed or observed (para-1) | |
| (ii) willing to co-operate (para-2) | |
| (iii) a mistaken belief or a misunderstanding (para-3) | |
| (iv) a distinctive character, belief and culture of people (para-6) | |

2. Read the given passage carefully and answer the question that follow:

8 marks

When was the last time you laughed really hard - a hearty, side splitting belly laugh that suddenly grabbed you and sent you reeling out of control?

Modern science is beginning to confirm that this kind of laughter is not only enjoyable but also health promoting. Laughter is an invigorating tonic that heightens and brightens the mood, gently releasing us from tensions and social constraints.

If you hate to do a regular workout, laughter may be the exercise programme you've been looking for! Laughter is called "inner jogging". A robust laugh gives the muscles of your face, shoulders, diaphragm and abdomen a good workout. Heart rate and blood pressure temporarily rise, breathing becomes faster and deeper and oxygen surges through your bloodstream. Sometimes your muscles go limp and your blood pressure temporarily may fall, leaving you in a mellow euphoria. A good laugh can burn up as many calories per hour as brisk walking.

Sadly, our culture seems to inhibit humour. We learn to associate growing up with "getting serious" and being serious is somehow associated with being solemn and humourless. Sometimes we repress our good humour, because we are afraid that others will think we are frivolous or foolish.

But you need to repair your sense of humour. Expose yourself to humour and seek out things that make you laugh. Having a good sense of humour doesn't mean you have to have a store of jokes or tell them perfectly. Do not worry about how well you are telling it.

Focus on yourself rather than others. If you can allow yourself the inevitable mistakes then you can laugh at yourself. Those who can laugh at themselves have a much stronger sense of self worth than those who can't. A stressful situation can sometimes be transformed into a bit of fun if you can see the humour in it. Make sure that people around you are fun to be with. Certain people make you feel relaxed and happy. Spend more time with people who boost your mood. Research has shown that just changing your facial muscles can set off different physiological changes. It can also trigger different thoughts that affect moods of sadness, happiness and anger. And if you can't smile, fake it.

Not all humour is positive and healthy. Watch out for scorn, sarcasm, ridicule and contempt and inappropriate humour. And don't joke about people's names. They have to live with them. It is important to be sensitive.

Humour can be a powerful medicine and laughter can be contagious. And the only side effect is pleasure.

QUESTION PAPER CODE 212

SECTION A : READING

(20 Marks)

1. Read the passage given below and answer the questions that follow:

12 marks

- 1 Life begins at 40. Mine certainly did. Our son wanted to study at a good university abroad. In the early 1950s, if you had a dream, it remained unfulfilled unless you could afford it. Taking a loan was unthinkable. That was only for life and death matters. We advised our son to keep studying and graduate well from school.
- 2 For the first time in my life I thought of taking up a job. At 40 ? No degrees, no business experience. Not very promising. Besides, I would hate to be cooped up in an office from nine to five. What would I like to do ? I liked meeting people. That suggested travel, tourism, hotels. Although we had lived in Calcutta for years, I had never really seen the city. For the next four Sundays, my husband drove me to all the places in the Guide Book. My inspection tours showed there was good scope for an entrepreneur in city tourism. Why not become a tourist guide? I was sure I could do a much better job. Then the 'buts' set in. What will people say? Why is Silloo roaming around in taxis with strange men? Are the Mehta's so hard up ? Could I take it ?
- 3 It wouldn't require much capital. The only investment was myself. The more knowledge I acquired about the country, the better I would be at my job. I

definitely liked the idea because it gave me freedom to be myself. One morning, dressed elegantly, I went to a major travel agent's office. Assuming me to be a customer, I was shown to the Manager's desk. I told him what I had discovered and suggested he engage me as a guide for his tourists. Mr. Roper was astonished but receptive. He said, "Mrs. Mehta, you are the answer to our prayers. Many a time we have to pull out the office staff because we have no one to accompany our VIP tourists." Thus began Mrs. Mehta's Guide Service.

- 4 Next day I called some of my friends to coffee. I selected four ladies. All were educated, intelligent and comfortable in any society. They were bored with their lives and as I expected, ready to try something new. I warned them that they would earn peanuts but learn a great deal. I prepared a slim guide book about India. My guides should know something about India's history, geography, governance, economy, population, religions, etc ...
- 5 We spend a large part of the time driving around and talking to the tourists. By the end of the tour we have usually established a good rapport. When I read some of the letters tourists have written to me, I feel a glow in my heart even now. I don't remember their faces but they must have been nice people to take time from their busy lives to say 'thank you' to a guide so far away. Here are some of the nicest letters. "You are the best guide I've ever had in all my lengthy travels." "You contributed more to my understanding of India than several dozens of other people." "The very delicious tea in your home and the stimulating conversation is one of the highlights of our trip." What more can one want?
- 6 Slowly, the business grew. Suddenly, everyone wanted to be one of Mrs. Mehta's guides. Those who had taken a dim view of my career choice began calling me up !
- 7 In the meantime, my son got a scholarship to the university.
 - (a) On the basis of your understanding of the passage, answer the following in your own words:
 - (i) Why was the narrator unable to fulfill her son's dream of studying abroad? 2
 - (ii) What are the factors that dissuaded the narrator from taking up a job as a tourist guide? 2

- (iii) What did the narrator require to start her new business? 2
- (iv) Was the narrator a successful businesswoman? Give reasons for your answer. 2
- (b) Pick out words/phrases from the passage which are similar in meaning to the following: 4
- (i) someone who starts a business (para 2)
- (ii) willing to listen or consider suggestions (para 3)
- (iii) understanding and respecting one another (para 5)
- (iv) making one feel active/inspiring (para 5)
2. Read the given passage carefully and answer the questions that follow: 8 marks

The key finding in a recent study that even top schools in major cities in India suffer from the entrenched tendency to impart rote learning may have some shock value to those who believe that private educational institutions place greater emphasis on quality and holistic education. However, for those closely observing the school education scenario, it is a re-affirmation of a bitter truth: schools in our country are, by and large, quite far from seeing education as a process of learning with understanding, acquiring knowledge through self-discovery and conceptualisation; rather, education remains a mere transmission of information in a rigid classroom atmosphere, where the emphasis is on memorisation and the objective is to rush through a pre-determined syllabus and prepare children for examinations. While on the scholastic side the WIPRO-Educational Initiatives 'Quality Education Study', which covered 89 schools, shows fall in learning standards among students in classes 4, 6 and 8 over the last five years, it also flags a disturbing deficit of social sensitivity on the part of a sizable section of students. Responses to some questions relating to the education of girls and attitudes towards immigrants, the disabled, and HIV-positive patients, indicated biases that could, over time, grow into prejudices. Exploring the mind of the young at a formative stage in this way, which some might consider methodologically challengeable, is a particularly valuable part of this study. It will be a serious mistake to ignore the broad trend that indicates misconceptions of early years being carried on to a higher age and the possibility of these children imbibing biases they see in their family atmosphere or social milieu.

Over the years, there have been some serious efforts to put in place a national curriculum framework. For instance, the Yash Pal Committee's progressive report

of 1993, *Learning without Burden*, demonstrated how the curriculum load was a burden on the child and highlighted the defects of the examination system. The National Curriculum Framework 2005 was a game attempt to provide a vision of education as a pursuit of both quality and equity. Yet, despite increasing awareness that learning is not mere information accumulation and that teaching ought to be recast into a facilitation of children's discovery of their own potential and understanding, the emphasis in practice continues to be on textbooks and exams. Conceptual understanding is not encouraged anywhere near enough, and sport, art, debate, and cultural activity are kept at the distant periphery. It is time not merely for fostering greater awareness about the need for holistic education but also to chalk out more imaginative pedagogic means to make education an inclusive and quality-centric epistemic process.

Marking Scheme — Functional English

General Instructions :

1. The Marking Scheme carries only suggested value points for the answers. These are only guidelines and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the marks should be awarded accordingly.
2. Answer scripts should not be given to the evaluators for evaluation until and unless the given Marking Scheme has been thoroughly discussed with them in a group or individually on the first day of evaluation.
3. The Head Examiner must go through the first five answer scripts evaluated by each evaluator to ensure that the evaluation has been carried out as per the Marking Scheme. The remaining answer scripts meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
4. Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one's own interpretation or any other consideration. However, the Marking Scheme carries only suggested value points and does not constitute the complete answer.
5. If a question has parts, please award marks on the right hand side for each part. Marks awarded for different parts of the question should then be totalled up and written in the left hand margin and circled.
6. If a question does not have any parts, marks must be awarded in the left-hand margin.
7. Where marks are allotted separately for content and expression in the Marking Scheme they have to be reflected separately and then totalled. This is a mandatory requirement.
8. A slash (/) in the Marking Scheme indicates alternative answers. If a student writes an answer which is not given in the Marking Scheme but which is equally acceptable, marks should be awarded only in consultation with the Head Examiner.
9. If a candidate has attempted an extra question, answer of the question deserving more marks should be retained and the other answer be scored out.
10. If a student writes a single word in response to a short answer type question and it constitutes the core of the answer it should be accepted and awarded full marks.
11. If a student literally lifts a portion of the given passage as an answer to a question no marks should be deducted for this so long as it is relevant and indicative of the desired understanding on the part of the student especially in Q.1 (Section A) and Q.10 (Section D).

12. Some of the questions may relate to Higher Order Thinking Skills. These questions are to be evaluated carefully and student's understanding/analytical ability may be judged.
13. Wherever the word limit is given, no marks are to be deducted for exceeding the word limit.
14. As per orders of the Honourable Supreme Court, the candidates would now be permitted to obtain photocopy of the Answer Book on request on payment of the prescribed fee. All Examiners/Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.
15. All Examiners/Head Examiners are instructed that while evaluating the answer scripts, if the answer is found to be totally incorrect, the (x) should be marked on the incorrect answer and awarded '0' mark.
16. A full scale of marks - 0 to 100 is to be used. In case of an answer book deserving 95 marks and above, marks be awarded in consultation with the Head Examiner only.

ii.	a	-	the
iii.	of	-	off
iv.	show	-	shows
v.	nutrient	-	nutrients
vi.	does	-	do
vii.	than	-	over
viii.	had	-	have
	study	-	studies
	doctor's	-	doctors
ix.		-	no error
x.	reason	-	reasons

Note: Line viii has 3 options as indicated above. Line ix has no error. ½ mark to be awarded irrespective of whether a student has made the correction or not.

Q9. FRAMING QUESTIONS**TOTAL-5 MARKS**

Objectives: To understand the context and frame relevant and appropriate questions.

Marking: ½ mark each for every accurate question framed

Note: No marks to be awarded if there is any inaccuracy. The ten questions should cover at least any of the two areas specified in the given input.

Suggested Answers:

1. Is the wellness centre centrally located?
2. How large is the centre?
3. Do you like the decor of the centre?
4. Are you satisfied with the cleanliness and hygiene of the centre?
5. Is the equipment adequate and well maintained?
6. Are you happy with the quality of the trainers?
7. Are there adequate number of trainers?
8. Are the trainers courteous and helpful?
9. Are you satisfied with the service?
10. Do the trainers spend adequate time with the customers?

SECTION D:**LITERATURE****TOTAL -35 MARKS**

In Section D, (Q10) questions have been designed to test a student's understanding of the passage and his/her ability to interpret, evaluate and respond to the given passage. As such, content assumes more importance than expression in the answers to these questions. Please do not hesitate to award full marks if the answer deserves it especially in the long answers.

Q10. REFERENCE TO CONTEXT**TOTAL- 7 MARKS**

Objective: To test students' comprehension of poetry – local, global, interpretative, inferential and evaluative

Marking:

7 marks

Answers:

OPTION (1) SYMPATHY

- a) Sympathy - ½ mark
Paul Laurence Dunbar - ½ mark
- b) -to emphasize the fact that the scars are not new - 1 mark
- to emphasize that the pain is an old one - 1 mark

General Instructions:

1. *All questions are compulsory.*
2. *The question paper consists of 29 questions divided into three sections, A, B and C. Section A comprises of 10 questions of one mark each, Section B comprises of 12 questions of four marks each and Section C comprises of 7 questions of six marks each.*
3. *All questions in Section A are to be answered in one word, one sentence or as per the exact requirement of the question.*
4. *There is no overall choice. However, internal choice has been provided in 4 questions of four marks each and 2 questions of six marks each. You have to attempt only one of the alternatives in all such questions.*
5. *Use of calculators is not permitted.*

QUESTION PAPER CODE 65/1/1

SECTION A

Question numbers 1 to 10 carry 1 mark each.

1. If a line has direction ratios 2, -1, -2, then what are its direction cosines? 1
2. Find ' λ ' when the projection of $\mathbf{a} = \lambda\mathbf{i} + \mathbf{j} + 4\mathbf{k}$ on $\mathbf{b} = 2\mathbf{i} + 6\mathbf{j} + 3\mathbf{k}$ is 4 units. 1
3. Find the sum of the vectors $\mathbf{a} = \mathbf{i} - 2\mathbf{j} + \mathbf{k}$, $\mathbf{b} = -2\mathbf{i} + 4\mathbf{j} + 5\mathbf{k}$ and $\mathbf{c} = \mathbf{i} - 6\mathbf{j} - 7\mathbf{k}$. 1
4. Evaluate: $\int_2^3 \frac{1}{x} dx$. 1
5. Evaluate $\int (1-x)\sqrt{x} dx$. 1

6. If $\Delta = \begin{vmatrix} 5 & 3 & 8 \\ 2 & 0 & 1 \\ 1 & 2 & 3 \end{vmatrix}$, write the minor of the element a_{23} . 1

7. If $\begin{pmatrix} 2 & 3 \\ 5 & 7 \end{pmatrix} \begin{pmatrix} 1 & -3 \\ -2 & 4 \end{pmatrix} = \begin{pmatrix} -4 & 6 \\ -9 & x \end{pmatrix}$, write the value of x. 1

8. Simplify: $\cos \theta \begin{bmatrix} \cos \theta & \sin \theta \\ -\sin \theta & \cos \theta \end{bmatrix} + \sin \theta \begin{bmatrix} \sin \theta & -\cos \theta \\ \cos \theta & \sin \theta \end{bmatrix}$ 1

9. Write the principal value of $\cos^{-1}\left(\frac{1}{2}\right) - 2 \sin^{-1}\left(-\frac{1}{2}\right)$. 1

10. Let * be a 'binary' operation on N given by $a * b = \text{LCM}(a, b)$ for all $a, b \in \mathbb{N}$. Find $5 * 7$.

SECTION - B

Question numbers 11 to 22 carry 4 marks each.

11. If $(\cos x)^y = (\cos y)^x$, find $\frac{dy}{dx}$. 4

OR

If $\sin y = x \sin(a + y)$, prove that $\frac{dy}{dx} = \frac{\sin^2(a + y)}{\sin a}$.

12. How many times must a man toss a fair coin, so that the probability of having at least one head is more than 80% ? 4

13. Find the Vector and Cartesian equations of the line passing through the point 4

$(1, 2, -4)$ and perpendicular to the two lines $\frac{x-8}{3} = \frac{y+19}{-16} = \frac{z-10}{7}$ and

$$\frac{x-15}{3} = \frac{y-29}{8} = \frac{z-5}{-5}$$

14. If \vec{a} , \vec{b} , \vec{c} are three vectors such that $|\vec{a}| = 5$, $|\vec{b}| = 12$ and $|\vec{c}| = 13$, and $\vec{a} + \vec{b} + \vec{c} = \vec{0}$, find the value of $\vec{a} \cdot \vec{b} + \vec{b} \cdot \vec{c} + \vec{c} \cdot \vec{a}$. 4

15. Solve the following differential equation: 4

$$2x^2 \frac{dy}{dx} - 2xy + y^2 = 0.$$

16. Find the particular solution of the following differential equation; 4

$$\frac{dy}{dx} = 1 + x^2 + y^2 + x^2y^2, \text{ given that } y = 1 \text{ when } x = 0.$$

17. Evaluate: $\int \sin x \sin 2x \sin 3x \, dx$

OR

Evaluate: $\int \frac{2}{(1-x)(1+x^2)} \, dx$

18. Find the point on the curve $y = x^3 - 11x + 5$ at which the equation of tangent is $y = x - 11$. 4

OR

Using differentials, find the approximate value of $\sqrt{49.5}$.

19. If $y = (\tan^{-1}x)^2$, show that 4

$$(x^2 + 1)^2 \frac{d^2y}{dx^2} + 2x(x^2 + 1) \frac{dy}{dx} = 2.$$

20. Using properties of determinants, prove that 4

$$\begin{vmatrix} b+c & q+r & y+z \\ c+a & r+p & z+x \\ a+b & p+q & x+y \end{vmatrix} = 2 \begin{vmatrix} a & p & x \\ b & q & y \\ c & r & z \end{vmatrix}$$

21. Prove that $\tan^{-1}\left(\frac{\cos x}{1 + \sin x}\right) = \frac{\pi}{4} - \frac{x}{2}$, $x \in \left(-\frac{\pi}{2}, \frac{\pi}{2}\right)$. 4

OR

Prove that $\sin^{-1}\left(\frac{8}{17}\right) + \sin^{-1}\left(\frac{3}{5}\right) = \cos^{-1}\left(\frac{36}{85}\right)$.

22. Let $A = \mathbb{R} - \{3\}$ and $B = \mathbb{R} - \{1\}$. Consider the function $f : A \rightarrow B$ defined by 4
 $f(x) = \left(\frac{x-2}{x-3}\right)$. Show that f is one-one and onto and hence find f^{-1} .

SECTION - C

Question numbers 23 to 29 carry 6 marks each.

23. Find the equation of the plane determined by the points $A(3, -1, 2)$, $B(5, 2, 4)$ and $C(-1, -1, 6)$ and hence find the distance between the plane and the point $P(6, 5, 9)$. 6

24. Of the students in a college, it is known that 60% reside in hostel and 40% are day scholars (not residing in hostel). Previous year results report that 30% of all students who reside in hostel attain 'A' grade and 20% of day scholars attain 'A' grade in their annual examination. At the end of the year, one student is chosen at random from the college and he has an 'A' grade, what is the probability that the student is a hostlier ?

25. A manufacturer produces nuts and bolts. It takes 1 hour of work on machine A and 3 hours on machine B to produce a package of nuts. It takes 3 hours on machine A and 1 hour on machine B to produce a package of bolts. He earns a profit of ₹ 17.50 per package on nuts and ₹ 7 per package of bolts. How many packages of each should be produced each day so as to maximize his profits if he operates his machines for at the most 12 hours a day? Form the above as a linear programming problem and solve it graphically. 6

26. $\int_0^{\pi/4} (\sqrt{\tan x} + \sqrt{\cot x}) dx = \sqrt{2} \cdot \frac{\pi}{2}$ 6

OR

Evaluate $\int_1^3 (2x^2 + 5x) dx$ as a limit of a sum.

27. Using the method of integration, find the area of the region bounded by the lines $3x - 2y + 1 = 0$, $2x + 3y - 21 = 0$ and $x - 5y + 9 = 0$. 6

28. Show that the height of a closed right circular cylinder of given surface and maximum volume, is equal to the diameter of its base. 6

29. Using matrices, solve the following system of linear equations:

$$x - y + 2z = 7$$

$$3x + 4y - 5z = -5$$

$$2x - y + 3z = 12$$

OR

Using elementary operations, find the inverse of the following matrix:

$$\begin{pmatrix} -1 & 1 & 2 \\ 1 & 2 & 3 \\ 3 & 1 & 1 \end{pmatrix}$$

QUESTION PAPER CODE 65/1
SECTION A

Question numbers 1 to 10 carry 1 mark each.

1. The binary operation $*$: $\mathbb{R} \times \mathbb{R} \rightarrow \mathbb{R}$ is defined as $a * b = 2a + b$.

Find $(2 * 3) * 4$.

2. Find the principal value of $\tan^{-1} \sqrt{3} - \sec^{-1}(-2)$.

3. Find the value of $x + y$ from the following equation:

$$2 \begin{bmatrix} x & 5 \\ 7 & y-3 \end{bmatrix} + \begin{bmatrix} 3 & -4 \\ 1 & 2 \end{bmatrix} = \begin{bmatrix} 7 & 6 \\ 15 & 14 \end{bmatrix}$$

4. If $A^T = \begin{bmatrix} 3 & 4 \\ -1 & 2 \\ 0 & 1 \end{bmatrix}$ and $B = \begin{bmatrix} -1 & 2 & 1 \\ 1 & 2 & 3 \end{bmatrix}$, then find $A^T - B^T$.

5. Let A be a square matrix of order 3×3 . Write the value of $|2A|$, where $|A| = 4$.

6. Evaluate:

$$\int_0^2 \sqrt{4-x^2} \, dx$$

7. Given $\int e^x (\tan x + 1) \sec x \, dx = e^x f(x) + c$.

Write $f(x)$ satisfying the above.

8. Write the value of $(\hat{i} \times \hat{j}) \cdot \hat{k} + \hat{i} \cdot \hat{j}$

9. Find the scalar components of the vector \vec{AB} with initial point A(2, 1) and terminal point B(-5, 7).

10. Find the distance of the plane $3x - 4y + 12z = 3$ from the origin.

SECTION B

Question numbers 11 to 22 carry 4 marks each.

11. Prove the following:

$$\cos \left(\sin^{-1} \frac{3}{5} + \cot^{-1} \frac{3}{2} \right) = \frac{6}{5\sqrt{13}}$$

12. Using properties of determinants, show that

$$\Delta = \begin{vmatrix} b+c & a & a \\ b & c+a & b \\ c & c & a+b \end{vmatrix} = 4abc$$

13. Show that $f : \mathbb{N} \rightarrow \mathbb{N}$, given by

$$f(x) = \begin{cases} x + 1, & \text{if } x \text{ is odd} \\ x - 1, & \text{if } x \text{ is even} \end{cases}$$

is both one-one and onto.

OR

Consider the binary operations $*$: $\mathbb{R} \times \mathbb{R} \rightarrow \mathbb{R}$ and \circ : $\mathbb{R} \times \mathbb{R} \rightarrow \mathbb{R}$ defined as $a * b = |a - b|$ and $a \circ b = a$ for all $a, b \in \mathbb{R}$. Show that ' $*$ ' is commutative but not associative, ' \circ ' is associative but not commutative.

14. If $x = \sqrt{a^{\sin^{-1}t}}$, $y = \sqrt{a^{\cos^{-1}t}}$, show that $\frac{dy}{dx} = -\frac{y}{x}$.

OR

Differentiate $\tan^{-1} \left[\frac{\sqrt{1+x^2}-1}{x} \right]$ with respect to x .

15. If $x = a(\cos t + t \sin t)$ and $y = a(\sin t - t \cos t)$, $0 < t < \frac{\pi}{2}$,

find $\frac{d^2x}{dt^2}$, $\frac{d^2y}{dt^2}$ and $\frac{d^2y}{dx^2}$.

16. A ladder 5 m long is leaning against a wall. The bottom of the ladder is pulled along the ground, away from the wall, at the rate of 2 cm/s. How fast is its height on the wall decreasing when the foot of the ladder is 4 m away from the wall ?

17. Evaluate:

$$\int_{-1}^2 |x^3 - x| dx$$

OR

Evaluate:

$$\int_0^{\pi} \frac{x \sin x}{1 + \cos^2 x} dx$$

18. Form the differential equation of the family of circles in the second quadrant and touching the coordinate axes.

OR

Find the particular solution of the differential equation

$$x(x^2 - 1) \frac{dy}{dx} = 1; y = 0 \text{ when } x = 2.$$

19. Solve the following differential equation:

$$(1 + x^2) dy + 2xy dx = \cot x dx; x \neq 0$$

20. Let $\vec{a} = \hat{i} + 4\hat{j} + 2\hat{k}$, $\vec{b} = 3\hat{i} - 2\hat{j} + 7\hat{k}$ and $\vec{c} = 2\hat{i} - \hat{j} + 4\hat{k}$. Find a vector \vec{p} which is perpendicular to both \vec{a} and \vec{b} and $\vec{p} \cdot \vec{c} = 18$.
21. Find the coordinates of the point where the line through the points A(3, 4, 1) and B(5, 1, 6) crosses the XY-plane.
22. Two cards are drawn simultaneously (without replacement) from a well-shuffled pack of 52 cards. Find the mean and variance of the number of red cards.

SECTION C

Question numbers 23 to 29 carry 6 marks each.

23. Using matrices, solve the following system of equations:

$$2x + 3y + 3z = 5, x - 2y + z = -4, 3x - y - 2z = 3$$

24. Prove that the radius of the right circular cylinder of greatest curved surface area which can be inscribed in a given cone is half of that of the cone.

OR

An open box with a square base is to be made out of a given quantity of cardboard of area c^2 square units. Show that the maximum volume of the box is $\frac{c^3}{6\sqrt{3}}$ cubic units.

25. Evaluate: $\int \frac{x \sin^{-1}x}{\sqrt{1-x^2}} dx$

OR

Evaluate: $\int \frac{x^2 + 1}{(x-1)^2 (x+3)} dx$

26. Find the area of the region $\{(x, y): x^2 + y^2 \leq 4, x + y \geq 2\}$.

27. If the lines $\frac{x-1}{-3} = \frac{y-2}{-2k} = \frac{z-3}{2}$ and $\frac{x-1}{k} = \frac{y-2}{1} = \frac{z-3}{5}$ are perpendicular, find the value of k and hence find the equation of plane containing these lines.

28. Suppose a girl throws a die. If she gets a 5 or 6, she tosses a coin 3 times and notes the number of heads. If she gets 1, 2, 3 or 4 she tosses a coin once and notes whether a head or tail is obtained. If she obtained exactly one head, what is the probability that she threw 1, 2, 3 or 4 with the die?

29. A dietician wishes to mix two types of foods in such a way that the vitamin contents of the mixture contains at least 8 units of vitamin A and 10 units of vitamin C. Food I contains 2 units/kg of vitamin A and 1 unit/kg of vitamin C while Food II contains 1 unit/kg of vitamin A and 2 units/kg of vitamin C. It costs ₹ 5 per kg to purchase Food I and ₹ 7 per kg to purchase Food II. Determine the minimum cost of such a mixture. Formulate the above as a LPP and solve it graphically.

Marking Scheme --- Mathematics

General Instructions :

1. The Marking Scheme provides general guidelines to reduce subjectivity in the marking. The answers given in the Marking Scheme are suggested answers. The content is thus indicative. If a student has given any other answer which is different from the one given in the Marking Scheme, but conveys the meaning, such answers should be given full weightage.
2. Evaluation is to be done as per instructions provided in the marking scheme. It should not be done according to one's own interpretation or any other consideration — Marking Scheme should be strictly adhered to and religiously followed.
3. Alternative methods are accepted. Proportional marks are to be awarded.
4. In question(s) on differential equations, constant of integration has to be written.
5. If a candidate has attempted an extra question, marks obtained in the question attempted first should be retained and the other answer should be scored out.
6. A full scale of marks 0 to 100 has to be used. Please do not hesitate to award full marks if the answer deserves it.
7. Separate Marking Scheme for all the three sets has been given.
8. As per orders of the Hon'ble Supreme Court. The candidates would now be permitted to obtain photocopy of the Answer book on request on payment of the prescribed fee. All examiners/Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.

QUESTION PAPER CODE 65/1/1

EXPECTED ANSWERS/VALUE POINTS

SECTION - A

Marks

1-10. 1. $\frac{2}{3}, \frac{-1}{3}, \frac{-2}{3}$ 2. $\lambda = 5$ 3. $-4 \hat{j} - \hat{k}$ 4. $\log\left(\frac{3}{2}\right)$

5. $\frac{2}{3}x^{3/2} - \frac{2}{5}x^{5/2} + c$ 6. $M_{2,3} = 7$ 7. 13 8. $\begin{pmatrix} 1 & 0 \\ 0 & 1 \end{pmatrix}$

9. $\frac{2\pi}{3}$ 10. 35 $1 \times 10 = 10 \text{ m}$

SECTION - B

11. $(\cos x)^y = (\cos y)^x \Rightarrow y \log \cos x = x \log \cos y$ $\frac{1}{2} \text{ m}$

$\therefore y \cdot \frac{(-\sin x)}{\cos x} + \log \cos x \cdot \frac{dy}{dx} = x \cdot \frac{(-\sin y)}{\cos y} \frac{dy}{dx} + \log \cos y$ $1+1 \text{ m}$

$(\log \cos x + x \tan y) \frac{dy}{dx} = \log \cos y + y \tan x$ 1 m

$\therefore \frac{dy}{dx} = \frac{\log \cos y + y \tan x}{\log \cos x + x \tan y}$ $\frac{1}{2} \text{ m}$

OR

$\sin y = x \sin (a + y) \Rightarrow \cos y \frac{dy}{dx} = x \cos (a + y) \frac{dy}{dx} + \sin (a + y)$ 1 m

$\therefore \frac{dy}{dx} = \frac{\sin (a + y)}{\cos y - x \cos (a + y)}$ 1 m

$x = \frac{\sin y}{\sin (a + y)} \Rightarrow \frac{dy}{dx} = \frac{\sin (a + y)}{\cos y - \frac{\sin y}{\sin (a + y)} \cdot \cos (a + y)}$ 1 m

$\therefore \frac{dy}{dx} = \frac{\sin^2 (a + y)}{\sin (a + y) \cos y - \cos (a + y) \sin y} = \frac{\sin^2 (a + y)}{\sin a}$ 1 m

12. Let the coin be tossed n times

$$\therefore P(\text{getting at least one head}) > \frac{80}{100} \quad 1 \text{ m}$$

$$\therefore 1 - P(0) > \frac{8}{10} \Rightarrow P(0) < 1 - \frac{8}{10} = \frac{2}{10} = \frac{1}{5} \quad 1 \text{ m}$$

$$\therefore nC_0 \left(\frac{1}{2}\right)^0 \left(\frac{1}{2}\right)^n < \frac{1}{5} \text{ or } \frac{1}{2^n} < \frac{1}{5} \text{ or } 2^n > 5 \quad 1 \text{ m}$$

$$\Rightarrow n = 3 \quad 1 \text{ m}$$

13. Equations of the line can be written as $\frac{x-1}{a} = \frac{y-2}{b} = \frac{z+4}{c}$ $\frac{1}{2} \text{ m}$

since the line is perpendicular to two given lines

$$\therefore 3a - 16b + 7c = 0 \text{ and } 3a + 8b - 5c = 0 \quad \frac{1}{2} \text{ m}$$

$$\therefore \frac{a}{24} = \frac{b}{36} = \frac{c}{72} \quad 1 \text{ m}$$

Hence the equations of the line are

$$\frac{x-1}{24} = \frac{y-2}{36} = \frac{z+4}{72} \text{ or } \frac{x-1}{2} = \frac{y-2}{3} = \frac{z+4}{6} \quad 1 \text{ m}$$

and the vector form is

$$\mathbf{r} = (\hat{i} + 2\hat{j} - 4\hat{k}) + \lambda (2\hat{i} + 3\hat{j} + 6\hat{k}) \quad 1 \text{ m}$$

14. $\vec{a} + \vec{b} + \vec{c} = \vec{0} \Rightarrow (\vec{a} + \vec{b} + \vec{c})^2 = 0$ $\frac{1}{2} \text{ m}$

$$\Rightarrow \mathbf{a}^2 + \mathbf{b}^2 + \mathbf{c}^2 + 2(\vec{a} \cdot \vec{b} + \vec{b} \cdot \vec{c} + \vec{c} \cdot \vec{a}) = 0 \quad 1 \text{ m}$$

$$\text{or } |\vec{a}|^2 + |\vec{b}|^2 + |\vec{c}|^2 + 2(\vec{a} \cdot \vec{b} + \vec{b} \cdot \vec{c} + \vec{c} \cdot \vec{a}) = 0 \quad 1 \text{ m}$$

$$\therefore \vec{a} \cdot \vec{b} + \vec{b} \cdot \vec{c} + \vec{c} \cdot \vec{a} = -\frac{1}{2} \left(|\vec{a}|^2 + |\vec{b}|^2 + |\vec{c}|^2 \right) \quad \frac{1}{2} \text{ m}$$

$$= -\frac{1}{2} (25 + 144 + 169) = -169 \quad 1 \text{ m}$$

$$15. \quad 2x^2 \frac{dy}{dx} - 2xy + y^2 = 0 \Rightarrow \frac{dy}{dx} = \frac{2xy - y^2}{2x^2} = \frac{2y/x - y^2/x^2}{2} \quad \frac{1}{2} \text{ m}$$

$$\text{Putting } \frac{y}{x} = v \text{ so that } y = vx \text{ and } \frac{dy}{dx} = v + x \frac{dv}{dx} \quad 1 \text{ m}$$

$$\therefore v + x \frac{dv}{dx} = v - \frac{1}{2} v^2 \quad \therefore x \frac{dv}{dx} = -\frac{1}{2} v^2 \quad \frac{1}{2} \text{ m}$$

$$\Rightarrow 2 \int \frac{dv}{v^2} = - \int \frac{dx}{x} \Rightarrow \frac{2}{v} = \log x + c \quad 1 \text{ m}$$

$$\therefore 2 \frac{x}{y} = \log x + c \quad \text{or} \quad y = \frac{2x}{\log x + c} \quad 1 \text{ m}$$

$$16. \quad \frac{dy}{dx} = 1 + x^2 + y^2 + x^2 y^2 = (1 + x^2) (1 + y^2) \quad \frac{1}{2} \text{ m}$$

$$\Rightarrow \int \frac{dy}{1+y^2} = \int (1+x^2) dx \quad 1 \text{ m}$$

$$\Rightarrow \tan^{-1} y = x + \frac{x^3}{3} + c \quad 1 \text{ m}$$

$$x = 0, y = 1 \Rightarrow c = \frac{\pi}{4} \quad 1 \text{ m}$$

$$\therefore \tan^{-1} y = x + \frac{x^3}{3} + \frac{\pi}{4} \quad \text{or} \quad y = \tan \left(\frac{\pi}{4} + x + \frac{x^3}{3} \right) \quad \frac{1}{2} \text{ m}$$

SECTION - A

- | | | |
|----|--|---|
| 1. | Give meaning of an Economy. | 1 |
| 2. | What is Market Demand? | 1 |
| 3. | What is the behaviour of average fixed cost as output increases? | 1 |
| 4. | What is the behaviour of average revenue in a market in which a firm can sell more only by lowering the price? | 1 |
| 5. | What is a price taker firm ? | 1 |
| 6. | What is opportunity cost? Explain with the help of a numerical example. | 3 |

7. Given price of a good, how does a consumer decide as to how much of that good to buy? 3
8. Draw Average Variable Cost, Average Total Cost and Marginal Cost Curves in a single diagram. 3

Note: The following question is for the blind candidates only, in lieu of Q. No.8.

Explain the relation between Marginal Cost and Average Variable Cost. 3

9. An individual is both the owner and the manager of a shop taken on rent. Identify implicit cost and explicit cost from this information. Explain. 3
10. Explain the implication of large number of buyers in a perfectly competitive market.

OR

Explain why are firms mutually interdependent in an oligopoly market. 3

11. Define an indifference curve. Explain why an indifference curve is downward sloping from left to right. 4
12. When price of a good is Rs. 7 per unit a consumer buys 12 units. When price falls to Rs. 6 per unit he spends Rs. 72 on the good. Calculate price elasticity of demand by using the percentage method. Comment on the likely shape of demand curve based on this measure of elasticity. 4
13. What does the Law of Variable Proportions show? State the behaviour of total product according to this law.

OR

Explain how changes in prices of other products influence the supply of a given product. 4

14. Explain how do the following influence demand for a good: 6
- (i) Rise in income of the consumer.
- (ii) Fall in prices of the related goods.

15. Explain the conditions of a producer's equilibrium in terms of marginal cost and marginal revenue. Use diagram. 6

Note: The following question is for the blind candidates only in lieu of Q. No. 15.

Explain the conditions of producer's equilibrium in terms of marginal cost and marginal revenue. Use a schedule. 6

16. Market for a good is in equilibrium. There is simultaneous "increase". both in demand and supply of the good. Explain its effect on market price.

OR

Market for a good is in equilibrium. There is simultaneous "decrease" both in demand and supply of the good. Explain its effect on market price. 6

SECTION - B

17. Define stock variable. 1
18. Define capital goods. 1
19. What are demand deposits? 1
20. Define a Tax. 1
21. Give meaning of managed floating exchange rate. 1
22. Calculate Gross Value Added at Factor Cost:
- | | | |
|-------------------------------------|--------|---|
| (i) Units of output sold (units) | 1,000 | |
| (ii) Price per unit of output (Rs.) | 30 | |
| (iii) Depreciation (Rs.) | 1,000 | |
| (iv) Intermediate cost (Rs.) | 12,000 | |
| (v) Closing stock (Rs.) | 3,000 | |
| (vi) Opening stock (Rs.) | 2,000 | |
| (vii) Excise (Rs.) | 2,500 | |
| (viii) Sales tax (Rs.) | 3,500 | 3 |

23. Explain the significance of the 'Store of Value' function of money. 3
24. Outline the steps taken in deriving saving curve from the consumption curve. Use diagram. 3

Note: The following question is for the blind candidates only in lieu of Q. No. 24.

- Distinguish between consumption function equation and saving function equation. 3
25. Find national income from the following: 3
- Autonomous consumption = Rs. 100
- Marginal propensity to consume = 0.80
- Investment = Rs. 50
26. Distinguish between Revenue Expenditure and Capital Expenditure in a government budget. Give examples.

OR

- Explain the role of Government budget in allocation of resources. 3
27. Giving reason explain how should the following be treated in estimating national Income:
- (i) Expenditure on fertilizers by a farmer.
- (ii) Purchase of tractor by a farmer. 4
28. Explain the components of Legal Reserve Ratio.

OR

- Explain 'bankers' bank, function of Central bank. 4
29. Explain 'revenue deficit' in a Government budget? What does it indicate? 4
30. Find out (a) national income and (b) net national disposable income:
- (Rs. crore)**
- (i) Factor income from abroad 15
- (ii) Private final consumption expenditure 600

(iii)	Consumption of fixed capital	50	
(iv)	Government final consumption expenditure	200	
(v)	Net current transfers to abroad	(-) 5	
(vi)	Net domestic fixed capital formation	110	
(vii)	Net factor income to abroad	10	
(viii)	Net imports	(-) 20	
(ix)	Net indirect tax	70	
(x)	Change in stocks	(-) 10	4, 2

31. Explain the concept of 'excess demand' in macroeconomics. Also explain the role of 'open market operation' in correcting it.

OR

Explain the concept of 'deficient demand' in macroeconomics. Also explain the role of Bank Rate in correcting it. 6

32. Explain the distinction between autonomous and accommodating' transactions in balance of payments. Also explain the concept of balance of payments 'deficit' in this context. 6

QUESTION PAPER CODE 58/1

SECTION - A

1. Define microeconomics. 1
2. Give one reason for a shift in demand curve. 1
3. What is the behaviour of Total Variable Cost, as output increases? 1
4. What is the behaviour of Marginal Revenue in a market in which a firm can sell any quantity of the output it produces at a given price? 1
5. What is a price-maker firm? 1
6. Define Production Possibilities Curve. Explain why it is downward sloping from left to right. 3

7. A consumer consumes only two goods X and Y and is in equilibrium. Price of X falls. Explain the reaction of the consumer through the Utility Analysis. 3
8. Draw Total Variable Cost, Total Cost, and Total Fixed Cost curves in a single diagram. 3

Note :- The following question is for the **Blind Candidates** only, in lieu of Q. No.8.

Explain the behaviour of total cost as output increases.

9. A producer starts a business by investing his own savings and hiring the labour. Identify implicit and explicit costs from this information. Explain. 3
10. Explain the implications of large number of sellers in a perfectly competitive market. 3

OR

Explain why there are only a few firms in an oligopoly market.

11. Define an indifference map. Why does an indifference curve to the right show more utility? Explain. 4
12. A consumer buys 10 units of a commodity at a price of Rs. 10 per unit. He incurs an expenditure of Rs. 200 on buying 20 units. Calculate price elasticity of demand by the percentage method. Comment upon the shape of demand curve based on this information. 4
13. What does the Law of Variable Proportions show? State the behaviour of marginal product according to this law.

OR

Explain how changes in prices of inputs influence the supply of a product. 4

14. Explain the difference between (i) inferior goods and normal goods and (ii) cardinal utility and ordinal utility. Give example in each case. 6
15. Explain the distinction between "change in quantity supplied" and "change in supply". Use diagram. 6

Note: The following question is for the **Blind Candidates** only, in lieu of Q. No. 15.

Explain the distinction between "change in quantity supplied" and "change in supply" with the help of a table.

16. Market for a good is in equilibrium. There is simultaneous "decrease" both in demand and supply but there is no change in market price. Explain with the help of a schedule how it is possible. 6

OR

Market for a good is in equilibrium. Explain the chain of reactions in the market if the price is (i) higher than equilibrium price and (ii) lower than equilibrium price.

SECTION B

17. Define flow variable. 1
18. Define consumption goods. 1
19. What are time deposits? 1
20. Define a 'direct tax'. 1
21. What is a fixed exchange rate? 1
22. Find Net Value Added at Market Price: 3
- | | |
|--------------------------------------|--------|
| (i) Depreciation (Rs.) | 700 |
| (ii) Output sold (units) | 900 |
| (iii) Price per unit of output (Rs.) | 40 |

| (v) Opening stock (Rs.) | 800 |
| (vi) Sales tax (Rs.) | 3,000 |
| (vii) Intermediate cost (Rs.) | 20,000 |
23. Explain the 'standard of deferred payment' function of money. 3
24. Outline the steps taken in deriving Consumption Curve from the Saving Curve. Use diagram. 3

Note: The following question is for the Blind Candidates only, in lieu of Q. No. 24.

Distinguish between propensity to consume and propensity to save, with the help of numerical examples.

25. Find Consumption Expenditure from the following: 3
- National Income = Rs. 5,000
- Autonomous Consumption = Rs. 1,000
- Marginal propensity to consume = 0.80

26. Distinguish between revenue receipts and capital receipts in a government budget. Give example in each case. 3

OR

Explain the role of government budget in bringing economic stability.

27. Should the following be treated as final expenditure or intermediate expenditure? Give reasons for your answer. 4
- (i) Purchase of furniture by a firm.
- (ii) Expenditure on maintenance by a firm.

28. Explain the 'lender of last resort' function of the central bank. 4

OR

Explain 'government's banker' function of the central bank.

29. Explain the concept of 'fiscal deficit' in a government budget. What does it indicate? 4

Marking Scheme — Economics

General Instructions

1. Please examine each part of a question carefully and allocate the marks allotted for the part as given in the marking scheme below. **TOTAL MARKS FOR ANY ANSWER MAY BE PUT IN A CIRCLE ON THE LEFT SIDE WHERE THE ANSWER ENDS.**
2. Expected suggested answers have been given in the Marking Scheme. To evaluate the answers the value points indicated in the marking scheme be followed.
3. For questions asking the candidate to explain or define, the detailed explanations and definitions have been indicated alongwith the value points.
4. For mere arithmetical errors, there should be minimal deduction. Only ½ mark be deducted for such an error.
5. Wherever only two / three or a 'given' number of examples / factors / points are expected only the first two / three or expected number should be read. The rest are irrelevant and must not be examined.
6. There should be no effort at “moderation” of the marks by the evaluating teachers. The actual total marks obtained by the candidate may be of no concern to the evaluators.
7. As per orders of the Hon'ble Supreme Court, the candidates would now be permitted to obtain photocopy of the Answer Book on request on payment of the prescribed fee. All examiners/ Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per valued point for each answers as given in the marking scheme

General Note : In case of numerical question no mark is to be given if only the final answer is given.

QUESTION PAPER CODE 58/1/1

<u>Q.No.</u>	<u>EXPECTED ANSWERS/VALUE POINTS</u>	<u>Distribution of marks</u>
Section – A		
1	Economy refers to the whole collection of production units in an area by which people get their living.	1
2	Market demand is the sum total of demand by all the consumers of a product at a price during a period of time.	1

- 3 AFC falls continuously. 1
- 4 AR continuously falls as output increases. 1
- 5 A price taker firm is a firm which has no option but to sell at a price determined at the industry level. 1
- 6 Opportunity cost is the next best alternative foregone in choosing a given alternative 1
- Suppose an economy produces only two goods X and Y. Further suppose that by employing these resources fully and efficiently, the economy produces $1X + 10Y$. If the economy decides to produce $2X$, it has to cut down production of Y by 2 units. Then $2Y$ is the opportunity cost of producing $1X$.(or any other relevant example) 2
- 7 Consumer purchases upto the point where $MU = Price$.So long as $MU > P$, he keeps on purchasing. As he makes purchases MU falls and at a particular quantity of the good MU becomes equal to Price. Consumer purchases upto this point. 3

[NOTE:-

For Evaluators

1. Please check that the vertical distance between ATC curve and AVC curve goes on falling.
2. Check that the MC curve passes through the minimum points of the AVC and ATC curves.
3. Check that all components of the diagram are properly labelled]

For Blind Candidates:-

- When $MC < AVC$, AVC falls. 1
- When $MC = AVC$, AVC is constant. 1
- When $MC > AVC$, AVC rises. 1
- 9 **Implicit cost:** estimated salary of the owner. 1
- Because the owner would have earned this salary if he had worked with a firm not owned by him. ½
- Explicit cost:** Rent paid. 1
- Because it is actual money expenditure on input. ½
- 10 The implication is that no single buyer is in a position to influence the market price on its own because an individual buyer's purchase forms a negligible proportion of the total purchase of the good in the market. 3

OR

- Firms are mutually interdependent because an individual firm takes decision about price and output after considering the possible reactions by the rival firms. 3
- 11 An Indifference Curve is locus of points representing different combinations of the only two goods consumer consumes with each combination having the same utility level. 1
- It is downward sloping because to obtain one more unit of a good he must sacrifice some units of the other good so that utility level on each point of the indifference curve remains the same.
- (No diagram required) 3

- 12 $\frac{\text{Price}}{7} \quad \frac{dd}{12}$ 1
- $6 \quad \frac{72}{6} \quad 12$
- ed $\frac{\Delta Q}{\Delta P} \quad \frac{P}{Q}$ 1

$$\frac{O}{-1} \quad \frac{7}{12} \quad \frac{1}{2}$$

$$O \quad \frac{1}{2}$$

The demand curve is parallel to the Y- axis 1

[**Note:** No diagram is required but if the explanation is through the diagram credit may be given.]

13 The Law of Variable Proportions shows the pattern of change in total output when only one input is increased, other inputs remaining unchanged. 1

Phase I TP first increases at an increasing rate.

Phase II TP increases but at a decreasing rate. 3

Phase III TP falls.

(No diagram required)

OR

I Suppose price of other products rise.

I It makes production of these products more profitable because their cost is unchanged.

I In comparison it also makes the given product less profitable.

I As a result the firm shifts its resources from the given product to the production of other products.

I Supply of the given product falls.

I Similarly, fall in the prices of other products increases the supply of the given product. (To be marked as a whole) 4

14 (i) When a consumer treats a good a normal good, rise in income leads to rise in its demand. 1

For example, if consumer treats good X as a normal good he is expected to demand more of X with rise in income. 1/2

When a consumer treats a good an inferior good, rise in income leads to fall in its demand. 1

For example, if consumer treats good Y an inferior good, he demands less of Y with rise in income. ½

(ii) Fall in the price of substitute good, leads to fall in demand of the given good because the relative price of the given good rises. 1

For example: fall in the price of coffee may lead to fall in demand for tea because relative price of tea rises. ½

Fall in price of the complementary good raises the demand for the given good. 1

For example: fall in the price of petrol may lead to rise in demand for cars. ½

15 There are two conditions of producer's equilibrium:

(i) $MC=MR$ 1

(ii) MC is greater than MR after equilibrium 1

The conditions are fulfilled at point E in the diagram ½

Explanation

(i) So long as MC is less than MR , it is profitable for the producer to go on producing more because it adds to its profits. He stops producing more when MC becomes equal to MR . 1

(ii) When MC is greater than MR after equilibrium it means producing more will lead to decline in profits. 1

For the blind candidates

Conditions (same as above)	1+1
Schedule	2
Explanation (Same as above)	1+1

16 There are three possibilites.

(1) If the relative(percentage) increase in demand is greater than the increase in supply, price will rise. 1

The price will rise because of excess demand in the market. 1

(2) If the relative (percentage) increase in demand is less than the increase in supply, price will fall. 1

The price will fall because of excess supply in market. 1

(3) If the relative(percentage) increase in demand is equal to the increase in supply, price will remain unchanged. 1

The price will remain unchanged because there is neither excess demand nor excess supply in the market 1

(No diagram required)

OR

There are three possibilites.

(1) If the relative (percentage) decrease in demand is greater than the decrease in supply, price will fall. 1

The price will fall because of excess supply in the market. 1

(2) If the relative (percentage) decrease in demand is less than the decrease in supply price will rise. 1

The price will rise because of excess demand in the market. 1

3) If the relative (percentage) decrease in demand is equal to the decrease in supply, price will remain unchanged. 1

The price will remain unchanged because there is neither excess demand nor excess supply in the market. 1

(No diagram required.)

SECTION B

- 17 A variable whose value is measured at a point of time. 1
- 18 Goods used in producing other goods are called capital goods. 1
- 19 Deposits which can be encashed by issuing cheques. 1
- 20 A legally compulsory payment imposed by government. 1

For Blind Candidates Only

The consumption function equation is : 1

$$C = \bar{C} + MPC(Y)$$

where C = Total consumption

\bar{C} = Autonomous consumption

MPC = Marginal propensity to consume ½

Y = National Income

The saving function equation is :

$$S = - \bar{C} + MPS(Y) \quad 1$$

where S = Total Saving

\bar{C} = Autonomous consumption

MPS = Marginal propensity to save ½

Y = National Income

25 $Y = \bar{C} + MPC(Y) + I$ 1½

$$= 100 + 0.8Y + 50$$

$$.2Y = 150 \quad 1$$

$$Y = 750 \quad ½$$

26 Revenue expenditure is the expenditure that neither reduces any liability nor does it lead to creation of assets. 1

Examples: Salaries etc. ½

Capital expenditure is the expenditure that either reduces liabilities or leads to creation of assets. 1

Example: expenditure on building etc. ½

OR

Government can give tax concessions and subsidies to encourage certain industries.

It can also undertake production directly.

(To be marked as a whole) 3

27 (i) It is intermediate cost for the farmer and deducted from value of output while arriving at national income. Therefore, not included. 2

(ii) It is included because it is capital formation / investment by the farmer. 2

(No marks will be given if reason is not given)

28 It has two components: Statutory Liquidity Ratio and Cash Reserve Ratio 1+1

SLR is the ratio of deposits which banks keep with themselves. 1

CRR is the ratio of deposits which banks keep with the central bank. 1

OR

Commercial banks are required to keep a certain minimum percentage of deposits as cash reserves with the central bank. Central banks uses these reserves to give loans to the commercial banks to meet their emergent needs. It is called the bankers' bank function of the central bank. 4

29 Revenue deficit is the excess of total revenue expenditure over total revenue receipts 2

It indicates that the government is spending more than the current income. 2

30 (i) N.I. = ii+iv+(vi +x)-viii-ix-vii 2

$$= 600+200+110+(-10)-(-20)-70-10 \quad 1\frac{1}{2}$$

$$= 600+200+110-10+20-70-10$$

$$= 840 \text{ crore} \quad \frac{1}{2}$$

(ii) NNDI = N.I + ix - v 1

$$= 840+70-(-5) \quad \frac{1}{2}$$

$$= 915 \text{ crore} \quad \frac{1}{2}$$

31 **Excess demand** refers to a situation when at the full employment level of income AD exceeds AS. It creates inflationary situation in the economy. 2

Open market operations refers to the sale and purchase of the government securities by the central bank in the open market.

When there is excess demand central bank sells securities. This leads to flow of money out of the commercial banks to the central bank when people make payment

by cheques. This reduces deposits with the banks leading to decline in their lending capacity.

Borrowings decline. AD declines.

4

OR

Deficient demand refers to a situation when at full employment level of income AD falls short of AS . It creates a deflationary situation.

2

Bank rate is the interest rate at which the central bank lends money to the commercial banks. When there is deficient demand the central bank lowers the bank rate. This induces the commercial banks to reduce their lending rates. As a result people borrow more. AD rises.

4

32 **Autonomous Transactions:** are independent of all other transactions in the BOP. These transactions are not influenced by the foreign exchange position of the country. Exports, imports etc are some examples.

Accommodating Transactions: are undertaken to cover deficit or surplus in the autonomous transactions. Therefore, their magnitude is determined by the autonomous transactions.

3

Deficit in BOP is determined only by the autonomous transactions. When autonomous foreign exchange payments exceed autonomous foreign exchange receipts, the excess is called BOP deficit.

QUESTION PAPER CODE 58/1

<u>Q.No.</u>	<u>EXPECTED ANSWERS/VALUE POINTS</u>	<u>Distribution</u>
--------------	--------------------------------------	---------------------

Section – A

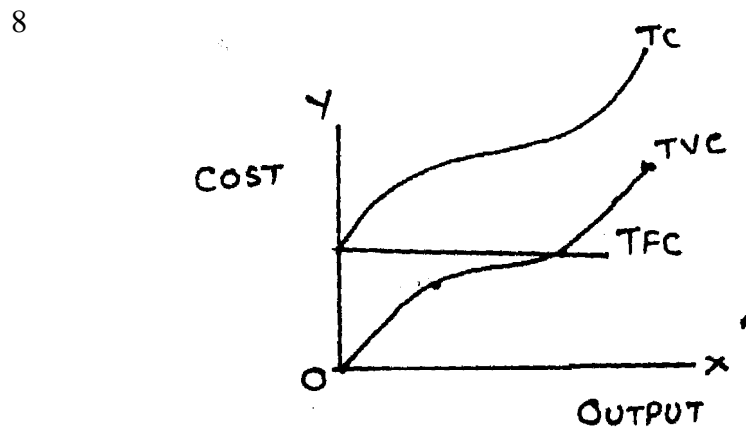

- | | | |
|---|---|---|
| 1 | Microeconomics studies the behaviour of individual economic agents/units. | 1 |
| 2 | A demand curve shifts when there is a change in a factor other than the own price of the product(any one reason). | 1 |
| 3 | TVC first increases at a decreasing rate and after a point increases at an increasing rate. | 1 |
| 4 | MR is constant at all levels of output. | 1 |

5 A price maker firm is one which can influence the market price of the product on its own. 1

6 PPC is the locus of points representing different combinations of the two goods which the economy can produce from the given resources assumed to be employed fully and efficiently. 1

A PPC is downward sloping because to produce more quantity of one good, the economy must produce less quantity of the other good. It is because resources are fixed. (Diagram not required). 2

7 The consumer is in equilibrium when $MU_x/P_x = MU_y/P_y$
 Given that P_x falls, therefore $MU_x/P_x > MU_y/P_y$
 Now since, per rupee MU from consumption of X is higher than from Y, the consumer will transfer expenditure from Y to X. The consumer will buy more of X. 3

Note for evaluators. Please check:

- 1) TFC curve is parallel to the X axis.
- 2) TC/TVC curve is concave in the beginning and convex after wards. 1+1+1
- 3) TC curve starts from the point from where TFC curve starts and is parallel to the TVC curve.

For blind Candidates

As output is increased, total cost initially increases at a decreasing rate and then increases at an increasing rate: 3

- 13 Law of variable proportions shows the effect on total output when only one input is increased while other inputs are kept unchanged. 1
- Phase I Initially MP increases.
- Phase II MP decreases but is positive. 3
- Phase III MP decreases but is negative.
- (Note: No diagram required. To be marked as a whole.)

OR

- 1 When prices of inputs fall, cost falls.
- 1 Price of the product remaining unchanged, fall in cost leads in rise in profits.
- 1 Rise in profit induces the producer to supply more. 4
- 1 Similarly a rise in prices of inputs will lead to fall in supply.
- 14 (i) Any good whose demand falls with rise in income is called an **Inferior good**.
 Example: Suppose with rise in income a consumer buys less of X and instead buys more of Y then good X is inferior for that consumer. 1½
- Normal good** is one whose demand rises with rise in income. Suppose with rise in income consumer buys more of X, then X is a normal good for that consumer. 1½
- (ii) When utility can be expressed in exact units it is called **Cardinal Utility**.
 Suppose a consumer says that he gets 2 units of utility from consumption of a good, than it is Cardinal Utility. 1½
- When utility is expressed in rank it is called **Ordinal Utility**. When a consumer says he gets less satisfaction from second unit as compared to the first unit, it is expression in terms of ordinal utility. 1½

15

2

Change in Quantity supplied' refers to change in supply due to own price of the good only. It means movement along the same supply curve. It is called extension when supply rises (from D to E) and contraction when supply falls (from F to E). 2

Change in supply' refers to change in supply due to factor other than the own price of the good like change in prices of inputs etc. This leads to shift of supply curve, It is called 'increase' when supply rises (from A to B) and 'decrease' when supply falls (from C to B) 2

For the blind candidates: .

Table 2

Change in Quantity supplied same as above 2

Change in supply 2

16	Price	D	S	After simultaneous decrease		
				D	S	
	3	100	200	50	100	
	2	150	150	75	75	
	1	200	100	100	50	3

The market is in equilibrium when price is Rs. 2 per unit because at this price demand equals supply. For price to remain unchanged after "decreases", the decrease in both must be by the same percentage. In the above table there is 50 percent decrease both in demand and supply. Therefore new equilibrium is also at a price of Rs. 2 per unit. 3

(No diagram required.)

OR

(i) When price is higher than equilibrium price:

- 1 There is excess supply and producers are not in a position to sell all they want to sell at the given price.
- 1 This leads to competition between producers.
- 1 Competition between producers leads to lowering of price.
- 1 Lowering of price raises demand while reduces supply. This continues till demand is equal to supply again at the original equilibrium. 3

- (ii) When price is lower than the equilibrium price:
- I There is excess demand and consumers are not in a position to buy all they want to buy at the given price. This leads to competition between consumers.
 - I Competition leads to rise in price.
 - I Rise in price reduces demand while raises supply. This continues till demand is equal to supply again at the original equilibrium.
- 3
- (No diagram required.)

SECTION B

- 17 Flow variable is a variable whose value is measured over a period of time. 1
- 18 Goods used for satisfaction of wants are consumption goods. 1
- 19 Time deposits are those deposits in banks from which money can be withdrawn after a specified period of time. 1
- 20 When the liability to pay and incidence of a tax lie on the same person. 1
it is called a direct tax.
- 21 Exchange rate fixed by government /Central bank. 1
- 22 $NVAmp = (iii \times ii) + iv - v - vii - i$ 1½
 $= (40 \times 900) + 1000 - 800 - 20000 - 700$
 $= 36000 + 1000 - 800 - 20000 - 700$ 1
 $= Rs. 15500$ ½
- 23 Money serves as a standard of payments contracted to be made in future. It makes borrowings and lending convenient. 3

24

1½

- Steps 1) Given S curve, take OC as equal to OS. 1½
- 2) Take a point B1 on the 45° line exactly above point B
- 3) Join C and B1

For Blind Candidates

Meaning of Propensity to Consume + Example 1½

Meaning of Propensity to Save + Example 1½

25 $C = \bar{C} + MPC(Y)$ 1½

=1000 + (0.8 x 5000) 1

= Rs. 5000 ½

26 **Revenue receipts** are receipts which neither reduce assets nor increase liabilities. 1½
Example: tax etc.

Capital receipts are receipts which either reduce assets or increase liabilities. 1½
Example: borrowing etc.

OR

Govt. can bring in economic stability i.e. avoiding fluctuation in prices through taxes and expenditure. In case of inflation, government can reduce its own expenditure or increase tax. In case of deflation government can give tax concession or increase expenditure to leave more disposable income in the hands of people. 3

27 i) It is final expenditure because it is investment expenditure. 2

ii) It is intermediate expenditure because it is an expenditure on single use producer goods. 2

(No marks to be given if the reason is not mentioned.)

28 Central bank lends money to the commercial banks in times of need. Dependence of commercial banks on central banks in times of emergent need is referred to as the 'lender of last resort' function of the central bank. 4

OR

Central bank is banker to the government like commercial banks are to be public. It accepts deposits from government and gives loans to the government. 4

- 29 Fiscal deficit refers to the excess of total budget expenditure (revenue expenditure + capital expenditure) over total budget receipts excluding borrowings. In this way it indicates borrowing requirements of the government during the current year. 2
- 30 $GNP_{mp} = (i) + v + (viii + iv - vii + ii) + ix - x$ 2
 $= 1000 + 300 + 110 + 20 - 20 + 100 + 15 - (-10)$ 1½
 $= Rs. 1535 \text{ crore}$ ½
- $NCTTA = GNP_{mp} - ii - iii$ 1
 $= 1535 - 100 - 1500$ ½
 $= Rs. (-)65 \text{ crore}$ ½
- 31 Inflationary Gap refers to the excess of Aggregate Demand over Aggregate Supply at full employment level of income. It is called inflationary because it brings in inflationary tendencies. 3
- (No diagram required.)
- Legal reserves refer to that part of bank deposits which commercial banks are legally required to keep in the form of cash partly with them selves (Statutory Liquidity Ratio) and partly with the central bank (cash reserve ratio). In case of inflationary gap, the central bank can increase the legal reserve ratio (LRR) so that less money is available to the banks for lending. Borrowings are reduced. AD falls. 3
- OR**
- Deflationary gap refers to Aggregate Demand falling short of Aggregate Supply at the full employment level of income. It is called deflationary because it brings in deflationary tendencies. 3
- (No diagram required.)
- Margin requirements refer to the discount on the security mortgaged by the borrowers. It is determined by the central bank. In case of deflationary gap the central bank reduces the discount so that the capacity to borrow is increased. This raises AD. 3
- 32 **Foreign exchange** refers to any currency other than the domestic currency. 1
- Foreign exchange rate** is the rate at which one currency can be converted into another currency. 1

Suppose foreign exchange rate falls, it means that imports etc have become cheaper because people now have to pay less for imports. As a result demand for imports etc. rises. This leads to increase in demand for foreign exchange. Similarly if exchange rate rises, the demand for foreign exchange falls.

Marking Scheme — Business Studies

General Instructions

1. The marking scheme carries only suggested value points for the answer. These are only guidelines and do not constitute the complete answer. The students can have their own expression and if the expression is correct, marks be awarded accordingly.
2. Evaluation is to be done as per instructions provided in the marking scheme.
3. If a question has parts, please award marks on the right hand side for each part. Marks awarded for different parts of the question should then be totalled up and encircled in the left hand margin.
4. If a question does not have parts, marks be awarded in the left hand margin.
5. If a candidate has attempted a question twice, marks should be given in the question attempted first and the question attempted later should be ignored with the comment 'Extra Attempt'.
6. In questions having options, if an examinee attempts both the options, assess the choice attempted first.
7. In a question, if two features/ characteristics/ points are asked but an examinee writes more than two features/ characteristics/ points, say, five, of which first is correct, second is incorrect, the first two should be assessed and the remaining should be ignored.
8. It is expected that the marking scheme should be followed objectively to ensure quality evaluation. For instance, if an examinee scores 30 marks, then the marks should not be inflated to 33 simply to pass him / her.
9. Marks should be awarded keeping in view the total marks of a particular question and not the total marks of the question paper. For example, if one mark is given to a 3 marks question even if nothing is correct, then that one mark constitutes 33% of the total marks for this answer.
10. The examiner shall also have to certify in the answer book that they have evaluated the answer book strictly in accordance with the value points given in the marking scheme and correct set of question papers.
11. In compliance to the judgement of Hon'ble Supreme Court of India, Board has decided to provide photocopy of the answer book(s) to the candidates who will apply for it along with the requisite fee from 2012 examination. Therefore, it is all the more important that the evaluation is done strictly as per the value points given in the marking scheme so that the Board could be in a position to defend the evaluation in any forum.
12. While evaluating the answer scripts, if the answer is found to be totally incorrect, it should be marked as (x) and awarded zero (0) marks.
13. A full scale of marks 0-100 has to be used. Please do not hesitate to award full marks if the answer deserves it. Similarly, wherever an examinee writes an answer upto the mark, his! her marks should not be deducted unnecessarily.

EXPECTED ANSWERS/VALUE POINTS

- 1 Q. Name the type of plan which is time bound and linked with measurable outcome. 1 mark**
- Ans. Objective/ Budget (any one)
- 2 Q. ‘Planning is done for achieving organisational goals’. Do you agree? Give one reason in support of your answer. 1 mark**
- Ans. Yes, I do agree. Planning ensures that the goals or objectives are clearly stated so that they act as a guide for deciding what action should be taken and in which direction.

18 Q. Explain the following as factors affecting financing decision:

- (i) Cost**
- (ii) Cash flow position of the business**
- (iii) Level of fixed operating costs**
- (iv) Control considerations.**

- Ans. (i) Cost: Debt is considered the cheapest of all sources; tax deductibility makes it still cheaper. **1 x 4**
- (ii) Cash flow position of the business: A stronger cash flow position makes debt funding more viable. **=**
- (iii) Level of fixed operating costs: If a business has high fixed operating costs, lower debt financing is better,
- (iv) Control considerations: Debt normally does not cause a dilution of control whereas issue of equity shares may reduce management control over the business. **4marks**

19 Q. Explain the following rights of the consumers:

- (a) Right to Safety**
- (b) Right to Consumer Education.**

- Ans. (a) Right to safety **2 + 2**
- Right to be protected against goods and services which are hazardous to life and health. **=**
 - Right to get protection against the risks caused due to the use of substandard products or products that do not conform to the safety norms. **4 marks**
- (b) Right to Consumer Education
- The consumer has the right to acquire knowledge and to be a well informed consumer.
 - He should be aware about his rights and the reliefs available to him in case of a product or service falling short of his expectations.

Marking Scheme — Accountancy

General Instructions

1. The Marking scheme provides general guidelines to reduce subjectivity in the marking. The answers given in the marking scheme are suggested answers. The content is thus indicative. If a student has given any other answer which is different from the one given in the marking scheme but conveys the same meaning, such answers should be given full weightage.
2. Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one's own interpretation or any other consideration-Marking Scheme should be strictly adhered to and religiously followed.
3. The Head-Examiner has to go through the first five answer scripts evaluated by each evaluator to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. The remaining answer scripts meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
4. If a question has parts, please award marks on the right hand side for each part. Marks awarded for different parts of the question should then be totalled up and written in the left hand margin and encircled.
5. If a question does not have any parts, marks must be awarded in the left hand margin and encircled.
6. If a student has attempted an extra question, answer of the question deserving more marks should be retained and other answer scored out.
7. No marks to be deducted for the cumulative effect of an error. It should be penalized only once.
8. Deductions up to 25% of the marks must be made if the student has not drawn formats of the Journal and Ledger and has not given the narrations.
9. A full scale of marks 1-80 has to be used. Please do not hesitate to award full marks if the answer deserves it.
10. No marks are to be deducted or awarded for writing / not writing 'TO and BY' while preparing Journal and Ledger accounts.
11. In theory questions, credit is to be given for the content and not for the format.
12. In compliance to the judgment of the Hon'ble Supreme Court of India, Board has decided to provide photocopy of the answer book(s) to the candidates who will apply for it along with the requisite fee from 2012 examination. Therefore, it is all the more important that

the evaluation is done strictly as per the value points given in the marking scheme so that the Board could be in a position to defend the evaluation at any forum.

13. In the light of the above judgment instructions have been incorporated in the guidelines for Centre Superintendents to ensure that the answer books of all the appeared candidates have been sent to the Board's office and in the Guidelines for spot evaluation for the Examiners that they have to evaluate the answer books strictly in accordance with the value points given in the marking scheme and the correct set of the question paper. The examiner(s) shall also have to certify this.
14. Every Examiner should stay up to sufficiently reasonable time normally 5-6 hours every day and evaluate 20-25 answer books.
15. In the past it has been observed that the following are the common types of errors committed by the Examiners-
 - I Leaving answer or part thereof unassessed in an answer script
 - I Giving more marks for an answer than assigned to it or deviation from the marking scheme.
 - I Wrong transference of marks from the inside pages of the answer book to the title page.
 - I Wrong question wise totaling on the title page.
 - I Wrong totaling of marks of the two columns on the title page
 - I Wrong grand total
 - I Marks in words and figures not tallying
 - I Wrong transference to marks from the answer book to award list
 - I Answers marked as correct but marks not awarded.
 - I Half or a part of answer marked correct and the rest as wrong but no marks awarded.
16. While evaluating the answer scripts if the answer is found to be totally incorrect, it should be marked as (X) and awarded zero(0) Marks.
17. Any unassessed portion, non-carrying over of marks to the title page or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
18. The Examiners should acquaint themselves with the guidelines given in the Guidelines for Spot Evaluation before starting the actual evaluation.
19. Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totaled and written in figures and words.

1. Calculation of Sacrificing ratio:

Sacrifice Ratio = Old Ratio – New Ratio

$$B = \frac{3}{5} - \frac{2}{5} = \frac{1}{5}$$

2+3½+2½ = 8 marks

$$C = \frac{2}{5} - \frac{2}{5} = Nil$$

2. Adjustment of Capitals:-

$$D's \text{ Capital} = Rs.30,000 \quad D's \text{ Share} = \frac{1}{5}$$

$$\text{Total Capital of new Firm} = \frac{\text{Capital of new Partner}}{\text{Share of profit of the New Partner}} = \frac{30,000 \times 5}{1} = 1,50,000$$

$$B's \text{ New Capital} = 1,50,000 \times \frac{2}{5} = Rs.60,000/-$$

$$C's \text{ New Capital} = 1,50,000 \times \frac{2}{5} = Rs.60,000/-$$

17. State the significance of ‘Lenders’. 1

Ans. Lenders are interested in the long term solvency of the firm OR its ability to repay debts and interest on loan

18. State the purpose ‘Cash Flow Statement’. 1

Ans. Any one of the following:-

1. To ascertain the specific sources (i.e. Operating/Investing/Financing Activities) from which cash and cash equivalents are generated by an enterprise.
2. To ascertain the specific uses (i.e. operating/investing/ Financing Activities) for which cash and cash equivalents are used by an enterprise.
3. To ascertain the net change in Cash and Cash equivalents indicating the difference between sources and uses from or by three activities between the dates of two subsequent years of balance sheets.

19. While preparing Investment company? 1

Ans. Operating Activity.

20. O.M. Ltd. has a Current Ratio Liabilities. 3

Ans. Let the Current Liabilities = x

Current Ratio 3:5:1, so current Assets =3.5x

Liquid Ratio 2:1, So Liquid Assets = 2x

Liquid Assets = Current Assets – Stock

$$2x = 3.5x - 1,50,000$$

$$-1.5x = -1,50,000$$

$$x = \frac{-15,00,000}{-15} = \text{Rs.}1,00,000$$

Current Liabilities =Rs. 1,00,000

Current Assets = 3.5 x 1,00,000 = Rs. 3,50,000

1+1+1 = 3 marks

21. From the following Tax rate 50%.

4

Ans. (Any Two)

$$(A) \text{ Debt Equity Ratio} = \frac{\text{Debt}}{\text{Equity}}$$

Debt = 9% Debentures

= Rs. 20,000

Equity = Equity share Cap. + Gen. Rev. + Pr.& Loss. A/c – Disc. on Issue of Share

= 50,000 + 5,000 + 15,000 - 5,000

$$= \text{Rs.} 65,000 = \frac{20,000}{65,000} = 0.31 : 1$$

$$(B) \text{ Working Capital Turnover Ratio} = \frac{\text{Net Sales}}{\text{Working Capital}} = \frac{1,50,000}{5,000} = 30 \text{ Times}$$

Working Capital = Current Assets – Current Liabilities

= 20,000 - 15,000 = Rs. 5,000

┆ Current Assets = Debtors + Cash = 14,500 + 5,500 = 20,000

┆ Current Liabilities = Creditors = 15,000

$$(C) \text{ Return on Investment} = \frac{\text{profit before interest \& tax}}{\text{Capital Employed}} \times 100$$

$$\text{Profit Before Tax} = \frac{\text{profit After tax}}{100 - \text{tax rate}} \times 100 = \frac{1,50,000}{50} \times 100 = 30,000$$

┆ Profit before Interest and Tax = 30,000 + 1,800 [Interest on Debentures]

= Rs. 31,800

┆ Capital Employed = Equity Share Capital + General Reserve + P/LA/c

+ 9% Debentures – Discount on Issue of Shares

= 50,000 + 5,000 + 15,000 + 20,000 - 5,000

= Rs. 85,000

$$= \frac{31,800}{85,000} \times 100 = 37.41 \%$$

Marking Scheme — Entrepreneurship

General Instructions

1. The marking scheme carries only suggested value points for the answers. These are only guidelines and do not constitute the complete answer. The students can have their own expression and if the expression is correct, marks will be awarded accordingly.
2. Some of the questions may relate to higher order thinking ability. These questions are to be evaluated carefully and students understanding/ analytical ability may be judged. These questions will be indicated by a star mark.
3. Evaluation is to be done as per instructions provided in the Marking Scheme.
4. If a question has parts, please award marks in the right hand side for each part. Marks awarded for different parts of the question should then be totaled up and written in the left hand margin.
5. If a question does not have any part, marks be awarded in the left hand margin.
6. If a candidate has attempted a question twice, the first answer to be marked and corrected.
7. There are few questions on distinction between two concepts. Marks should be given only if the distinction is clearly given and is correct.
8. In case of choice type question, if an examinee attempts both the choices, first answer only should be assessed.
9. In a question, if two features/characteristics/points are asked, marks should be awarded for the first two points written.
10. It is expected that the Marking Scheme should be followed objectively to avoid over strict tendency in marking.
11. Marks should be awarded keeping in view the total marks of that particular question and not the total marks of the question paper.
12. A full scale of marks 0-70 has to be used. Please do not hesitate to award full marks if the answer deserves it. Similarly, wherever an examinee writes answer up to the mark, his/her marks should not be deducted unnecessarily.
13. Answer scripts written in English should be evaluated by the examiners teaching in English and answer scripts written in Hindi should be evaluated by the examiners teaching in Hindi.

14. In compliance to the judgment of the Hon'ble Supreme Court of India, Board has decided to provide photocopy of the answer book(s) to the candidates who will apply for it along with the requisite fee from 2012 examination. Therefore, it is all the more important that the evaluation is done strictly as per the value points given in the marking scheme so that the Board is in a position to defend the evaluation at any forum.
15. In the light of the above judgment instructions have been incorporated in the guidelines for centre superintendents to ensure that the answer books of all the appeared candidates have been sent to the Board's office. The examiners have to certify that they evaluated the answer books strictly in accordance with the value points given in the marking scheme.
16. Every examiner should stay upto sufficiently reasonable time, normally 5-6 hours everyday and evaluate 20-25 answer books.
